The Mysteries of Nature and Art John Bate, 1654 *Nature and the Human Soul* Bill Plotkin, 2010-10-04 Addressing the pervasive longing for meaning and fulfillment in this time of crisis Nature and the Human Soul introduces a visionary ecopsychology of human development that reveals how fully and creatively we can mature when soul and wild nature guide us Depth psychologist and wilderness guide Bill Plotkin presents a model for a human life span rooted in the cycles and qualities of the natural world a blueprint for individual development that ultimately yields a strategy for cultural transformation If it is true as Plotkin and others observe that we live in a culture dominated by adolescent habits

and desires then the enduring societal changes we so desperately need won't happen until we individually and collectively evolve into an engaged authentic adulthood. With evocative language and personal stories including those of elders Thomas Berry and Joanna Macy, this book defines eight stages of human life: Innocent, Explorer, Thespian, Wanderer, Soul Apprentice, Artisan, Master, and Sage, and describes the challenges and benefits of each. Plotkin offers a way of progressing from our current egocentric, aggressively competitive consumer society to an ecocentric soul-based one that is sustainable, cooperative, and compassionate. At once a primer on human development and a manifesto for change, *Nature and the Human Soul* fashions a template for a more mature, fulfilling, and purposeful life and a better world.
