Mystery Money:

Money Nico Stehr, Dustin Voss, 2019-10-08 Since the publication of Georg Simmel's *Philosophy of Money* more than a century ago social science has primarily considered money a medium of exchange This new book treats money as a more inclusive social concept that has profoundly influenced the emergence of modern society Money is also a moral and political category It communicates prices and thus embodies innumerable evaluations and judgments of objects and services of social relationships and associations At the same time modern societies are undergoing fundamental transformations in which money assumes an ever important role while banking and financial services constitute the new primary sector of modern service economies In this book the authors trace the transformational scope of monetarization and financialization along the four classical productive forces land capital labor and knowledge and evaluate the consequences of an irrepressible urge to quantify and monetarize almost everything social What happens to a society in which the tangible products of the real economy lose their preeminent status and everything is judged purely according to its economic value The authors identify an increasing disconnect between market prices and social values with serious social political economic and environmental consequences

Fast Money Schemes John Cox, 2018-10-02 In the late 1990s and early 2000s a wave of Ponzi schemes swept through Papua New Guinea Australia and the Solomon Islands The most notorious scheme U Vistract attracted many thousands of investors enticing them with promises of 100 percent interest to be paid monthly Its founder Noah Musingku was a charismatic leader who promoted the

scheme as a form of Christian mission and as the basis for establishing an independent kingdom Fast Money Schemes uses in depth interviews with investors newspaper accounts and participant observation to understand the scheme s appeal from the point of view of those who invested and lost showing that organizers and investors alike understood the scheme as a way of accessing and participating in a global economy John Cox delivers a post village ethnography that gives insight into the lives of urban middle class Papua New Guineans a group that is not familiar to US readers and that has seldom been a focus of anthropological interest The book s concern with understanding the interweaving of morality finance and aspirations shared by a global cosmopolitan middle class has wide resonance beyond studies of Papua New Guinea and anthropology
