scientific community and the world at large a Florida geologist discovered human remains mixed with the bones of prehistoric animals in a Vero Beach canal and proclaimed that humans had lived in North America since the Ice Age These new findings by Elias Sellards flew in the face of prevailing wisdom which held that humans first came to the continent only 6 000 years ago His claim was snubbed by the top scientists of his day he was laughed out of the state Vero's fame declined and the skull Sellards found famously known as Vero Man was lost An Ice Age Mystery tells the story of Sellards's exciting find and the controversy it sparked In the years that followed other archaeological discoveries and the rise of radiocarbon dating established that humans did arrive in North America earlier than previously thought The skull however was never recovered and many people began to wonder What exactly had Sellards found at Vero And what else might be buried there One hundred years after the first Vero discovery construction plans threatened to cover up the legendary dig site and a band of citizens and archaeologists protested Excavations were reopened Archaeologists uncovered 14 000 year old burnt mammal bones and charcoal signs of a human presence and found further evidence to indicate a continuous human occupation of the site for several thousand years Prior to the latest excavations an etching on a bone possibly 13 000 years old was discovered that could be the oldest piece of art in America Sellards had been right all along Many questions still remain Who were these people Where did they come from And how did they get here This book draws readers into the past present and future of one of the most historic discoveries in American archaeology
