Mythic Woods The Worlds Most Remarkable Forests:

Mythic Woods Jonathan Roberts, 2004 These magnificent and evocative color photos reveal why forests have been a source of inspiration to humankind throughout the ages The bestselling author of *Meeting with Remarkable Trees* has chosen 15 mythic woods from the famous Sherwood Forest so unlike its legendary image to the little known Valley of the Giants in Tasmania home to some of the world's tallest trees Some are huge and ecologically vital like the Amazon and Canadian rainforests others are tiny remnants like the Black Wood of Rannoch The rich and diverse gallery includes the Petrified Forest of Arizona and the towering underwater groves of the Californian Kelp Forest If anyone questions the need to nurture and protect Earth's forests these images offer a supremely eloquent answer *My Journey with a Remarkable Tree* Ken Finn, 2005-02-01 A journey through Cambodia with the simple and romantic ambition to find the folkloric spirit trees the powerful connecting force between man and nature Ken Finn's travels turned out to be anything but simple Back wearing motos immobilizing gastric assaults unexpected road blocks and monkish processions all contributed to the journey but most dramatically instead of enriching forests destruction was found the black market timber trade A new voice was found as Ken followed the trees on their journey to the furniture factories of Vietnam and subsequently a house somewhere on the North Circular London The book chronicles his trip not just through Southeast Asia but the inner transition from traveler to activist It charts the unlocking of a conscience and the discovery of a new sensitivity and passion showing that it is not a major shift in behavior to save the destruction and corruption of the planet and that it is important to care *Disappearing Forests* Corona Brezina, 2009-01-15 Examines deforestation and desertification discusses the human impact on forests and explores sustainable development and conservation **BBC Wildlife**, 2004 **The Hypothetical Species** Michael Charles Tobias, Jane Gray Morrison, 2019-03-28 This book is a provocative and invigorating real time exploration of the future of human evolution by two of the world's leading interdisciplinary ecologists Michael Charles Tobias and Jane Gray Morrison Steeped in a rich multitude of the sciences and humanities the book enshrines an elegant narrative that is highly empathetic personal scientifically wide ranging and original It focuses on the geo positioning of the human Self and its corresponding species The book's overarching viewpoints and poignant through story examine and powerfully challenge concepts associated historically with assertions of human superiority over all other life forms Ultimately *The Hypothetical Species* Variables of Human Evolution is a deeply considered treatise on the ecological and psychological state of humanity and her options both within and outside the rubrics of evolutionary research for survival This important work is beautifully presented with nearly 200 diverse illustrations and is introduced with a foreword by famed paleobiologist Dr Melanie DeVore **The British National Bibliography** Arthur James Wells, 2006 *Mythic Worlds and the One You Can Believe In* Harold Toliver, 2018-06-11 Combining philosophy science and literature *Mythic Worlds and the One You Can Believe In* examines lingering misconceptions of world history as a continuing source of international tension Awareness of the natural continuum

currently gauged at some 13.8 billion years overall disarms sectarian zealotry and in retrospect explains some of the difficulties the literary and philosophical traditions have had in accommodating their beliefs to what undeniably exists To this day beliefs incompatible with natural history continue to intensify nationalism and support terrorist movements As a work mainly in natural philosophy this book uses the consensus natural continuum to critique the more prominent and durable misconceptions

The Mythic Fantasy of Robert Holdstock Donald E. Morse, Kálmán Matolcsy, 2014-01-10 Robert Holdstock was a prolific writer whose oeuvre included horror fantasy mystery and the novelization of films often published under pseudonyms These twelve critical essays explore Holdstock's varied output by displaying his works against the backdrop of folk and fairy tales dissecting their spatiotemporal order and examining them as psychic fantasies of our unconscious life or as exempla of the sublime The individual novels of the Mythago Wood sequence are explored as is Holdstock's early science fiction and the Merlin Codex series
