Targeting Maths Katy Pike, Judy Tertini, Garda Turner, 2004

Number Sense and Nonsense Claudia Zaslavsky, 2019-09-03 More than 80 games and activities in this newly updated edition help kids ages 8 to 12 think critically about math instead of just memorizing rules Group and individual games teach fun useful ways to manipulate odd and even numbers prime and composite numbers common and decimal fractions and factors divisors and multiples of numbers Counting calculating and writing numbers in languages from other cultures such as China and Egypt provide more practice in understanding how numbers work Riddles puzzles number tricks and calculator games boost estimating and computation skills for every math student

Mathematical Circle Diaries, Year 1 Anna Burago, 2013 Early middle school is a great time for children to start their mathematical circle education This time is a period of curiosity and openness to learning The thinking habits and study skills acquired by children at this age stay with them for a lifetime Mathematical circles with their question driven approach and emphasis on creative problem solving have been rapidly gaining popularity in the United States The circles expose children to the type of mathematics that stimulates development of logical thinking creativity analytical abilities and mathematical reasoning These skills while scarcely touched upon at school are in high demand in the modern world This book contains everything that is needed to run a successful mathematical circle for a full year The materials distributed among 29 weekly lessons include detailed lectures and discussions sets of problems with solutions and contests and games In addition the book shares some of the know how of running a mathematical circle

The curriculum which is based on the rich and long standing Russian math circle tradition has been modified and adapted for teaching in the United States For the past decade the author has been actively involved in teaching a number of mathematical circles in the Seattle area This book is based on her experience and on the compilation of materials from these circles The material is intended for students in grades 5 to 7 It can be used by teachers and parents with various levels of expertise who are interested in teaching mathematics with the emphasis on critical thinking Also this book will be of interest to mathematically motivated children In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession
