Constructing the Colonized Land Izumi Kuroishi,2016-05-23 Despite the precipitous rise of East Asia as a center of architectural production since the Second World War informed studies remain lacking The lacuna is particularly conspicuous in terms of regional cross national studies documenting the close ties and parallels between China Taiwan Japan and Korea during this period Examining colonized cities in East Asia this book brings together a range of different perspectives across both space and time European Chinese Taiwanese Korean and Japanese discourses are examined with a range of complementary and conflicting views on the design of urban and architectural forms the political institutional religious and economical contexts of urban planning the role played by various media and the influence of various geographical social and anthropological research methods The diversity and plurality of these perspectives in this book provides an entwined architectural urban and social history of East Asia which offers insights into the cultural systems and the historical and spatial meanings of these colonized cities It concludes that the difficulties in the historical study of East Asia s colonial cities do not so much indicate cultural difference as the potentiality for multiple readings of the past toward the future

Oriental Architecture ,1989 Library of Congress Subject Headings Library of Congress,2006 **East Asia and the Global Crisis** Shaun Breslin,2013-09-13 This book traces the impact of the global financial crisis on East Asia and the way that key regional states responded to the crisis It considers the extent to which the region is decoupling from the global economy or the West the impact of crises on the definition of region and the effectiveness and functioning of regional institutions and governance mechanisms including environmental governance A key focus of the book is the increasing legitimacy of statist alternatives to neo liberal development strategies and modes of governance or perhaps more correctly the extent to which the legitimacy of western norms and practices have been delegitimized by the crisis This book was originally published as a special issue of Contemporary Politics State Formation through Emulation Chin-Hao
