Participatory Governance Jürgen R. Grote, Bernard Gbikpi, 2002 After years of a primarily and technocratic debate on European governance it is time to emphasize the term normative dimension This book singles out participation as the issue most crucial to it Participatory governance is introduced not as part of the problem but as part of the solution Going beyond Robert Dahl democratic dilemma the contributors try to identify and describe modes of governance based on system effectiveness cum citizen participation The concept is first developed in a theory section and then followed by chapters on the multi level and the multi sector contexts within which its empirical manifestations are travelling A conclusion comments on the White Paper on Governance by the European Commission and on the implications of likely governance failure This has been made possible by a generous grant of the EU Commission under the Fifth Framework Programme on Research and Development

Participatory Governance in Multi-Level Context Hubert Heinelt, Panagiotis Getimis, Grigoris Kafkalas, Randall Smith, Erik Swyngedouw, 2013-06-29 Angela Liberatore Governance shifted from a concept used by a few specialists to one quite widely while surely not universally used in policy making circles and pub lic debate This does not mean that the interpretation of the concept is in the meantime uncontested or obvious Analytical and policy debate is at times quite heated on whether governance means privatisation of government or rather involvement of various actors at various levels in policy making without dismantling the role of public authorities Therefore a better un derstanding is needed of what governance actually means why and how governance arrangements and actors in Europe are changing and what are the implications of such changes for instance in terms of democracy and le gitimacy Such understanding is especially needed in the specific context of the challenges to European policy making and institutions posed by the struc tural changes in the European society and economy the ongoing enlargement of the European Union and the new global context The analytical and policy need to better understand governance is ac knowledged and taken care of in a number of national and international re search initiatives and is part of a collective European endeavour Research on governance and citizenship started being undertaken in European Community research programmes within the Key Action Improving the socio economic knowledge

base of the 5 h Framework Research Programme and will be further supported in the 6 h Framework Programme under the priority on Citizens and governance in the knowledge based society **Participatory Governance in the EU** K.

Third Sector, and Co-Production Victor Pestoff, Taco Brandsen, Bram Verschuere, 2013-06-19 In recent years public management research in a variety of disciplines has paid increasing attention to the role of citizens and the third sector in the provision of public services. Several of these efforts have employed the concept of co-production to better understand and explain this trend. This book aims to go further by systematizing the growing body of academic papers and reports that focus on various aspects of co-production and its potential contribution to new public governance. It has an interdisciplinary focus that makes a unique contribution to the body of knowledge in this field at the crossroads of a number of disciplines including business administration, policy studies, political science, public management, sociology, third sector studies, etc. The unique presentation of them together in this volume both allows for comparing and contrasting these different perspectives and for potential theoretical collaboration and development. More particularly, this volume addresses the following concerns: What is the nature of co-production and what challenges does it face? How can we conceptualize the concept of co-production? How does co-production work in practice? How does co-production unfold in reality? What can be the effects of co-production? And more specific: firstly, how can co-production contribute to service quality and service management in public services and secondly, what is the input of co-production on growing citizen involvement and development of participative democracy?

Democracy Arthur Benz, Ioannis Papadopoulos, 2006-04-18 For the first time this new collection brings together country specialists, researchers on the European Union and leading international relations scholars to tackle a crucial question: how compatible are today's new patterns of policy networks and multi-level governance with democratic standards? This important question is attracting attention both in political science and in political practices. In political science the question is mainly dealt with in separated sub-disciplines which focus on different levels of politics. So far no serious exchange has actually taken place between authors working on these different levels. The editors of this book, both specialists of network and multi-level governance, show that although the issue is raised differently in the institutional settings of the national state, the European Union or transnational governance, excellent insights can be gained by comparison across these settings. This major new contribution includes cutting edge work from junior scholars alongside chapters by leading specialists of governance such as Guy Peters, Jon Pierre, Philippe C. Schmitter and Thomas Risse. It also contains a collection of new case studies, theoretical conceptualisations and normative proposals for solutions dealing with the issue of democratic deficits which all give the reader a better understanding of the most crucial problems and perspectives of democracy in different patterns of governance beyond conventional government approaches. This is a valuable book for policy analysts, students of the European Union and international relations and all students in social and political science. Society, Regulation and Governance

Regine Paul, Alfons Bora, Marc Mölders, Michael Huber, Peter Münte, 2017-07-28 Society Regulation and Governance brings together sociologists political scientists legal scholars and historians for an interdisciplinary critical evaluation of alleged new modes of social change specifically risk publics and participation The editors aim is to refocus scholarly attention on the possibility of intentional social change in contemporary society which underpin all novelty claims in regulation and governance research and practice This book gives significant insight into the new methods of social change suiting a wide range of social science academics due to its collaborative nature

The Palgrave Handbook of Co-Production of Public Services and Outcomes Elke Loeffler, Tony Bovaird, 2020-11-23 This Handbook provides a comprehensive and authoritative account of the movement towards co production of public services and outcomes a topic which has recently become one of the most intensely debated in public management and administration both in practice and in the academic literature It explores in depth the processes of co commissioning co design co delivery and co assessment as major approaches to co production through citizen voice and citizen action and as key mechanisms in the co creation of public value The key debates in the field are fully explored in chapters from over 50 eminent authors in the field who examine the roots of co production in the social sciences the growth of co production in policy and practice its implementation and management in the public domain and its governance including its negative aspects the dark side of co production A final section discusses different aspects of the future research agenda for co production

Interactive Governance Jacob Torfing, B. Guy Peters, Jon Pierre, Eva Sørensen, 2012-01-12 Governance has become one of the most commonly used concepts in contemporary political science It is however often used to mean a variety of different things This book helps to clarify this conceptual muddle by concentrating on one variety of governance interactive governance The authors argue that although the state may remain important for many aspects of governing interactions between state and society represent an important and perhaps increasingly important dimension of governance These interactions may be with social actors such as networks with market actors or with other governments but all these forms represent means of governing involving mixtures of state action with the actions of other entities This book explores thoroughly this meaning of governance and links it to broader questions of governance In the process of explicating this dimension of governance the authors also explore some of the more fundamental questions about governance theory For example although governance is talked about a great deal political science has done relatively little about how to measure this concept Likewise the term multi level governance has become widely used but its important to understand that idea more fully and see how it functions in the context of interactive forms of governance The authors also link governance to some very fundamental questions in political science and the social sciences more broadly How is power exercised in interactive governance How democratic is interactive governance and is democratic governance always advanced through transparency

Democratic Transgressions of Law Alfons Bora, Heiko Hausendorf, 2010-01-01 Participation of concerned actors and the public is a central element in the legal regulation of

science and technology In constitutional democracy these participatory forms are governed by the rule of law The volume critically examines participatory governance in this realm and makes suggestions with respect to further institutional and political cultural developments It assembles contributions of a broad interdisciplinary range within a comparative research programme opening the black box of participatory governance in legal procedure The contributions are the result of almost a decade of fruitful discussion between the authors They also demonstrate the potential of a cross disciplinary approach that stretches from sociology via political science and jurisprudence to hermeneutics linguistics and conversation analysis

Promises of the Political Erik Swyngedouw, 2018-08-28 The possibility of a new emancipatory and democratizing politics explored through the lens of recent urban insurgencies In Promises of the Political Erik Swyngedouw explores whether progressive and emancipatory politics is still possible in a post political era Activists and scholars have developed the concept of post politicization to describe the process by which the political is replaced by techno managerial governance If the political domain has been systematically narrowed into a managerial apparatus in which consensual governance prevails where can we find any possibility of a new democratic politics Swyngedouw examines this question through the lens of recent urban insurgencies In Zuccotti Park Paternoster Square Taksim Square Tahrir Square Hong Kong and elsewhere he argues insurgents have gathered to choreograph new configurations of the democratic Swyngedouw grounds his argument in urban and ecological processes struggles and conflicts through which post politicization has become institutionally entrenched He casts the city and nature as emblematic of the construction of post democratic modes of governance He describes the disappearance of the urban polis into the politics of neoliberal planetary urbanization and he argues that the political managerial framing of nature and the environment contributes to the formation of depoliticized governance most notably in the impotent politics of climate change Finally he explores the possibilities for a reassertion of the political considering whether after the squares are cleared the tents folded and everyday life resumes the urban uprisings of the last several years signal a return of the political
