Peace Movements: International Protest and World Politics Since 1945 April Carter, 2014-09-11 There is a long tradition of opposition to war and organized peace campaigns date from 1815 Since 1945 however modern weapons technology has threatened world wide destruction and has stimulated widespread protests This book sketches in the background of thinking about peace and resistance to war before 1945 and then examines how public opposition to nuclear weapons and testing grew in the 1950s and early 1960s Later chapters cover the major resurgence of nuclear disarmament campaigns in the 1980s The book also looks at how peace protest has spread from its origins in North America and North West Europe to embrace many parts of the world opposition to nuclear testing has indeed been particularly strong in Japan Australia New Zealand and the Pacific islands The period 1945 to 1990 was dominated by the Cold War between the USA and USSR and the role of the Soviet sponsored World Peace Council caused difficulties for independent peace groups in the West During the 1980s the emergence of autonomous peace activity in a number of East European countries and even on a very small scale in the USSR itself transformed the possibilities for East West co operation between citizens to urge disarmament and political change A chapter examines these developments Opposition to all forms of militarism has spread in the last 30 years This book charts the struggles to extend the right to conscientious objection to military service and draft resistance to particular wars for example in Southern Africa and Israel It also looks in some detail at the growing opposition to the war in the Vietnam The recent protests against the Gulf War are surveyed briefly in an epilogue

Rethinking the Red Power Movement Sam Hitchmough, Kyle T. Mays, 2024-06-28 Rethinking the Red Power Movement examines Red Power ideology with a focus on its many forms of solidarity with African Americans the role of gender in shaping the movement its international expansion and its current meaning in contemporary activism The Red Power Movement is often considered the apex of Indigenous activism in the twentieth century While diverse the movement is typically told through four actions Beginning with the occupation of Alcatraz in 1969 followed by the Trail of Broken Treaties in 1972 Wounded Knee in 1973 then culminating with the Longest Walk in 1978 there is a clear jumpstart middle and end to the Red Power Movement Through a chronological approach this study makes the case that Red Power never died and neither did Indigenous activism Instead it shows how Indigenous peoples found many ways to push forward Indigenous sovereignty and continue to call on the United States to value Indigenous possibilities for justice freedom and power This book is useful for students and scholars interested in twentieth century America social movements and the history of Indigenous activism

signals that something is wrong and this requires attention elaboration and a response to the challenge This analysis shows how different fields of enquiry deal with the resistance of social psychological mentalities in the face of industrial scientific and political activities inspired by projected futures **Asia's Environmental Movements in Comparative Perspective**

opposition parties And on the policy front it is faltering through poor implementation and a regurgitation of old ideas As Zuma s replacements start competing and succession politics take shape Booysen considers whether the ANC will recover from the damage wrought under Zuma s reign and attain its former glory Ultimately she believes that while the damage is irrevocable the electorate may still reward the ANC for transcending the Zuma years This is a must have reference book on the development of the modern ANC With rigour and incisiveness Booysen offers scholars and researchers a coherent framework for considering future patterns in the ANC and its hold on political power *Authentically Black and Truly Catholic* Matthew J. Cressler,2017-11-14 Chicago has been known as the Black Metropolis But before the Great Migration Chicago could have been called the Catholic Metropolis with its skyline defined by parish spires as well as by industrial smoke stacks and skyscrapers This book uncovers the intersection of the two Authentically Black and Truly Catholic traces the developments within the church in Chicago to show how Black Catholic activists in the 1960s and 1970s made Black Catholicism as we know it today The sweep of the Great Migration brought many Black migrants face to face with white missionaries for the first time and transformed the religious landscape of the urban North The hopes migrants had for their new home met with the desires of missionaries to convert entire neighborhoods Missionaries and migrants forged fraught relationships with one another and tens of thousands of Black men and women became Catholic in the middle decades of the twentieth century as a result These Black Catholic converts saved failing parishes by embracing relationships and ritual life that distinguished them from the evangelical churches proliferating around them They praised the quiet dignity of the Latin Mass while distancing themselves from the gospel choirs altar calls and shouts of amen increasingly common in Black evangelical churches Their unique rituals and relationships came under intense scrutiny in the late 1960s when a growing group of Black Catholic activists sparked a revolution in U S Catholicism **Board of Contract Appeals Decisions** United States.
