Quietest Singing:

The Quietest Singing Darrell H. Y. Lum, Joseph Stanton, Estelle Enoki, 2000-01-01 In this collection Hawai i Award for Literature recipients depict island life as complex multivoiced and multi layered **Silence, Music, Silent Music** Nicky Losseff, 2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage s idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy Silent Music Julian Wolfreys, 2014-10-23 In *Silent Music* Julian Wolfreys noted academic with a passion for the three languages of words music and the imagination brings together a group of musicians and Annagreth a young German blow in in the uncomfortable dreamscape of the Isle of Wight in the late 1970s *Individuality in music performance* Bruno Gingras, 2014-10-22 Humans are remarkably adept at identifying individuals on the basis of their facial features or other traits such as gait or vocal timbre Besides voice another auditory medium capable of carrying identity information is music Indeed certain famous musicians such as John Coltrane or Sonny Rollins need only to play a few notes to be unequivocally recognized Along with emotion and structural cues artistic individuality seems to be a key element communicated in music performance Yet the means by which individuality is expressed in performance as well as the cognitive processes employed by listeners to perceive identity cues remain poorly elucidated Other pertinent issues including the connection between a performer s technical competence and ability to convey a specific musical identity as well as potential links between individuality and career defining outcomes such as critical recognition and aesthetic appraisal warrant further exploration Quantitative approaches to the study of music performance have benefited greatly from MIDI technology and the application

of computational methods leading to the flourishing of empirical music performance research over the last few decades More recently neuroimaging techniques have provided valuable insights into the neural mechanisms involved in the cognitive processes of performing music Nevertheless this field continues to benefit greatly from qualitative approaches given that the communication of affect and identity cues in music performance leads to a rich subjectivity of impressions that must be accounted for in order to lead to a greater understanding of this multifaceted phenomenon The aim of this Research Topic is to provide a forum for interdisciplinary research broadly related to the expression and perception of individuality in music performance Research methodology includes behavioral psychophysiological and neuroimaging techniques Both quantitative and qualitative approaches are presented The scope of this Research Topic includes laboratory studies as well as studies in real life performance settings and longitudinal studies on performers

Eastern School Music Herald ,1917 *The Voice in the Headphones* David Grubbs,2020-03-20 The voice in the headphones says you re rolling The Voice in the Headphones is an experiment in music writing in the form of a long poem centered on the culture of the recording studio It describes in intricate prismatic detail one marathon day in a recording studio during which an unnamed musician struggles to complete a film soundtrack The book extends the form of Grubbs s previous volume Now that the audience is assembled sharing its goal of musicalizing the language of writing about music Mulling the insight that studio is the absence of pushback now that no audience is assembled The Voice in the Headphones details one musician s strategies for applying the requisite pressure to the proceedings for making it count The Voice in the Headphones is both a literary work and a meditation on sound recording delivered at a moment in which the commercial recording studio shades into oblivion It draws upon Grubbs s own history of several decades as a recording artist and its location could be described as every studio in which he has set foot

Quiet in the Land Anne Chislett,1996-11 Jacob Yock Bauman a young member of an Amish community near Kitchener Ontario chafes at the strict and he believes outmoded beliefs of his elders particularly those of his father Christy World War I is raging in Europe and most of Canada s young men have gone off to fight with the British forces but the Amish because of their pacifist convictions have refused to join the war effort By deciding to enlist Yock alienates himself not only from family and community but also from the lovely Katie Brubacher with whom he has fallen in love When Yock returns from the war Katie has wed someone else and ironically the very acts of bravery which have made him a hero to the rest of Canada have made Yock a bloody handed villain to his own people Although the compassionate Katie offers to leave her husband and go off with him Yock accepts his status as an outcast and departs alone but not before admitting that while standing over the body of a slain German soldier the meaning of pacifism was at last powerfully revealed to him In the end Yock s stern father now a bishop is vindicated but at the loss of the one he sought to save his beloved and only son Playdatabase com

Reconciliation: Inhabiting the Moral Life According to Colossians 3:16 Amy Whisenand Krall, 2023-10-30 The letter to the Colossians contains a series of moral instructions in Colossians 3:12-17 and includes the admonition to sing among them. This study considers how music making specifically singing supports moral formation according to the letter to the Colossians. Studies in ethnomusicology, anthropology of the voice, and music psychology offer useful frameworks for conceptualizing how a social practice like music making forms participants into a community and shapes how they know themselves, their community, and the world. With the aid of these frameworks, we find that the singing in Colossians 3:16 as a corporate vocal practice of music making enables the members of the church community to inhabit the story of reconciliation found in the Christ Hymn, Col 1:15-20.

Drawing Music, Marking Time David Griffin, 2025-01-23 Marking down the complexities of musical pieces on paper allows them to become portable, shareable, and eminently teachable, but how are the simple geometries of a music notation unfolded into space and time? A music notation is an almost impossibly complicated bit of drawing. Calling it a map or a diagram does not quite do the trick. Its tracery supplies mechanisms for planning, composition, analysis, annotation, and performance of music. But how is it that we read that simple, strategic two-dimensional geometry and make such complex four-dimensional performances? In this book, David Griffin guides readers to a comprehensive understanding of the structural properties of music notations with a particular focus on the standard Western staff notation system, looking at composers such as Bach, John Cage, Earle Brown, and Stockhausen. Developed over a thousand years ago, the staff notation is a geometrical drawing method using dots and lines on a horizontal timeline for explaining the structure of a musical piece. The system behaves a bit like a picture, but it is also like a diagram and a bit like writing in its structure. In the hands of an experienced user, the notation's complex of marks and phatic elements allows us to leave behind the mere denotation of diagrams or pictures to become a connotative drawing system. This book will attempt to decode music drawings, untangling their strange knots of graphic and linguistic elements. Using a series of visual examples, Griffin presents background information on how the staff notation developed as an interlinguistic inscription, a drawing that slips through the mere denotation of pictorial or diagrammatic graphics to become a connotative system with which we may craft subtle and powerful elements of musical poetry.

Musical Pathways in Recovery Gary Ansdell, Tia DeNora, 2016-09-17 Music triggered a healing process from within me. I started singing for the joy of singing myself, and it helped me carry my recovery beyond the state I was in before I fell ill nine years ago to a level of well-being that I haven't had perhaps for thirty years. This book explores the experiences of people who took part in a vibrant musical community for people experiencing mental health difficulties. SMART, St Mary Abbots Rehabilitation and Training, Ansdell, a music therapist, researcher, and DeNora, a music sociologist, describe their long-term ethnographic work with this group, charting the creation and development of a unique

music project that won the 2008 Royal Society for Public Health Arts and Health Award Ansdell and DeNora track the musical pathways of a series of key people within SMART focusing on changes in health and social status over time in relation to their musical activity The book includes the voices and perspectives of project members and develops with them a new understanding of how music promotes their health and wellbeing A contemporary ecological understanding of music and change is outlined drawing on and further developing theory from music sociology and Community Music Therapy This innovative book will be of interest to anyone working in the mental health field but also music therapists sociologists musicologists music educators and ethnomusicologists This volume completes a three part triptych alongside the other volumes Music Asylums Wellbeing Through Music in Everyday Life and How Music Helps In Music Therapy and Everyday Life
