**Subject Guide to Books in Print**, 1997 *The Concept*, 2003 **Scientific and Political Freedom in Islam** Uriya Shavit, 2017-02-24 The modernist apologetic approach to the relation between revelation and science and politics has been a central part of Arab discourses on the future of Muslim societies for over a century This approach introduced historical and theological narratives and interpretative mechanisms that contextualize reason and freedom in Islamic terms to argue that

unlike with Christianity it is possible for Muslim societies to be technologically and politically advanced without forfeiting revelation as an all encompassing legally binding guide Scientific and Political Freedom in Islam critically examines the coherence and consistency of modernist apologetic scholars This is done through a discussion of their general theorizing on reason and freedom which is then followed by discussions of their commentaries on specific scientific and political issues in light of their general theorizing Regarding the former the focus is Darwin s theory of evolution while the universality of the Biblical flood the heliocentric model the Big Bang model and Freudianism are also discussed Regarding the latter the focus is Islam s desired structure of government and concept of participatory politics while individual freedoms are also discussed The book argues that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory Introducing a significant body of new information on the reasons for the failure of secularism and democracy and the attitudes towards Darwinism in the Arab world this book is a valuable resource for students and scholars of Islamic Studies comparative religion democracy studies and evolution studies

Ali,2018-08-28 The bombings in New York and Washington in 2001 and subsequent terrorist attacks in different countries of the West have led to fast changing socio cultural and political contexts where Islam has been depicted as a global threat The meaning of being a Muslim has undergone rapid transformation with the interplay of perceptions and misperceptions impacted by for instance the Iranian Revolution of 1978 9 the Lockerbie bombing in 1988 the Gulf War of 1990 1 and the clash of civilizations thesis propagated by Samuel Huntington in 1993 This book examines the way Muslims and mainstream societies in the West perceive each other by taking into account themes like cultural pluralism media religious education interfaith dialogue and so on It argues that Muslims are not defined solely by their faith but as an emerging group which is self critical reflective and focused on clearing the misconceptions associated with their identity Further it posits that Westerners who are more knowledgeable about Muslims usually express positive opinions about Islam thereby arguing that the knowledge about and attitudes towards Islam are interrelated
