governing of the city The Education Mayor is a critical look at mayoral control of urban school districts beginning with Boston's schools in 1992 and examining more than 100 school districts in 40 states The authors seek to answer four central questions What does school governance look like under mayoral leadership How does mayoral control affect school and student performance What are the key factors for success or failure of integrated governance How does mayoral control effect practical changes in schools and classrooms The results of their examination indicate that although mayoral control of schools may not be appropriate for every district it can successfully emphasize accountability across the education system providing more leverage for each school district to strengthen its educational infrastructure and improve student performance Based on extensive quantitative data as well as case studies this analytical study provides a balanced look at America's education reform As the first multidistrict empirical examination and most comprehensive overall evaluation of mayoral school reform The Education Mayor is a must read for academics policymakers educational administrators and civic and political leaders concerned about public education

Putting Choice Before Democracy Emily Hauptmann, 1996-07-03 In this critique of rational choice theory Emily Hauptmann explores the idea central to the theory namely that democracy can best be explained in terms of an economic conception of choice Her argument turns on the claims that the choices we face as citizens are not reducible to the choices we face as consumers and that democracy cannot be reduced to a series of choices economic or otherwise

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d'être of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others *Expanding*

Opportunity in Higher Education Patricia Gándara, Gary Orfield, Catherine L. Horn, 2012-02-01 The dream of public higher education in America is to provide opportunity for many and to offer transformative help to American communities and the economy Expanding Opportunity in Higher Education explores the massive challenges facing California and the nation in realizing this goal during a time of enormous demographic change The immediate focus on California is particularly appropriate given the size of the state it educates one out of every nine students in the country and its checkered political record with respect to civil rights and educational inequities The book includes essays not only by academics looking at the state s educational system as a whole but also by those within the policy system who are trying to keep it going in difficult times The contributors show that the destiny of California and the nation rests on the courage of policymakers both within the universities and within the government to move aggressively to reclaim the hope of millions of students who can make enormous contributions to this society if only given the chance
