Materialist Feminism Rosemary Hennessy, Chrys Ingraham, 1997 During the 1980s capitalism triumphantly secured its global reach anti communist ideologies hammered home socialism's inherent failure the New Left increasingly moved into the professional middle class and many of feminism's earlier priorities were marginalized Identity politics often formulated in terms of social reconstructionism or multiculturalism has increasingly suppressed materialist feminism's systematic perspective replacing it with discourse analysis or cultural politics **Materialist Feminism A Reader** argues against the retreat to multiculturalism for keeping invisible the material links among the explosion of meaning making practices in highly industrialized social sectors the exploitation of women's labor and the appropriation of women's bodies that continues to undergird the scramble for profits and state power in multinational capitalism **International Journal of Group**

Bookbuyers' Reference Book ,1993 *Totems and Taboos* ,2008-01-01 Totems and Taboos Risk and Relevance in Research on Teachers and Teaching is a compilation of selected papers from the 2007 Biennial conference of the International Study Association on Teachers and Teaching ISATT held at Brock University This volume contains keynote addresses and papers based on thematic presentations delivered at the conference namely critically investigative items which have been sacred to systems institutions and educational practitioners in order to inform the theory and practice of teaching and research While consideration of the native or aboriginal historical tradition of Canada was instrumental in developing a theme dealing with the nature of totems it was recognized that such a heritage informs research and practice regardless of national borders The papers included in this book reflect global perspectives on the conference theme and

include thinkers from Australia Brazil Canada Denmark Finland Germany Great Britain Israel Slovenia Turkey and the United States In addition the writings of seasoned academics and well published authors the totems of the field so to speak are situated alongside papers from academic newcomers who have broken the taboo of not speaking in the presence of more experienced company The central metaphor of this book is the high wire or tightrope journey across Niagara Falls upon which we oscillate between the falsely dichotomous notions of research and teaching The tension in leaning towards one side or the other is presented as a negotiated process of balancing research and teaching which maintains our progress forward in the field Overlooking this edgy relationship will cause one to lean too much in one direction and fall into the chasm underneath Thus the sections of this book are designed to examine educational progress across this high wire while maintaining awareness of the risks taken on this journey Each paper is relevant to particular phases in this high wire walk and portrays the journeys of the authors within in order to inform the path of others

from those of other centuries Did orang utans talk like humans walk like humans even rape humans What was the skin pigmentation of Adam and Eve Did the spectrum of human physiognomies around the globe reflect the Fall of Man the Creator's bounty or merely bizarre beauty practices Why did the ideal beauty of the Greeks appear to be the reverse of the Hottentots The book contains some 50 illustrations including apes with hiking sticks or tea cups metamorphoses of living forms and Apollo or Venus icons which titillated the science of man
