## **Race Resistance And The Boy Scout Movement In British Colonial Afr:**

*Race, Resistance, and the Boy Scout Movement in British Colonial Africa* Timothy H. Parsons, 2004-11-01 Conceived by General Sir Robert Baden Powell as a way to reduce class tensions in Edwardian Britain scouting evolved into an international youth movement It offered a vision of romantic outdoor life as a cure for disruption caused by industrialization and urbanization Scouting's global spread was due to its success in attaching itself to institutions of authority As a result scouting has become embroiled in controversies in the civil rights struggle in the American South in nationalist resistance movements in India and in the contemporary American debate over gay rights In *Race Resistance and the Boy Scout Movement in British Colonial Africa* Timothy Parsons uses scouting as an analytical tool to explore the tensions in colonial society Introduced by British officials to strengthen their rule the movement targeted the students juvenile delinquents and urban migrants who threatened the social stability of the regime Yet Africans themselves used scouting to claim the rights of full imperial citizenship They invoked the Fourth Scout Law which declared that a scout was a brother to every other scout to challenge racial discrimination Parsons shows that African scouting was both an instrument of colonial authority and a subversive challenge to the legitimacy of the British Empire His study of African scouting demonstrates the implications and far reaching consequences of colonial authority in all its guises

**Modern Manhood and the Boy Scouts of America** Benjamin René Jordan,2016-03-07 In this illuminating look at gender and Scouting in the United States Benjamin Ren Jordan examines how in its founding and early rise the Boy Scouts of America BSA integrated traditional Victorian manhood with modern corporate industrial values and skills While showing how the BSA Americanized the original British Scouting program Jordan finds that the organization s community based activities signaled a shift in men s social norms away from rugged agricultural individualism or martial primitivism and toward productive employment in offices and factories stressing scientific cooperation and a pragmatic approach to the responsibilities of citizenship By examining the BSA s national reach and influence Jordan demonstrates surprising ethnic diversity and religious inclusiveness in the organization s founding decades For example Scouting officials preferred urban Catholic and Jewish working class immigrants and modernizable African Americans and Native Americans over rural whites and other traditional farmers who were seen as too backward to lead an increasingly urban industrial society In looking at the revered organization s past Jordan finds that Scouting helped to broaden mainstream American manhood by modernizing traditional Victorian values to better suit a changing nation

**The Age of Sex** Corrie Decker, 2025 As in much of the world societies in precolonial East Africa what is today Kenya Tanzania and Uganda used rites of passage to chart an individual's social and developmental progress toward adulthood Under European colonialism from the 1890s to the 1960s colonial judicial systems and the emerging genre of ethnography converged to subject African people to standardized definitions of childhood and adulthood The coexistence of rites of passage and chronological age regulations generated confusion well into the postcolonial era and the question of when childhood ends sparked extensive debate about gender race and development Corrie Decker argues that ultimately these debates came down to the age of sex The age of sex a term Decker conceptualizes in this carefully researched monograph refers to the hypothetical moment when a girl becomes a woman capable of engaging in heterosexual activity and a boy becomes a man imbued with the right and responsibility to have heterosexual intercourse Colonial ethnographic studies reduced complex precolonial rites of passage to puberty rites fixated on these sexual transformations The resulting stereotypes influenced in turn how colonial and postcolonial court officials decided age of consent and other sex crime cases Court rituals thus legally transformed girls into women by ruling on their sexual maturity and boys into men by sentencing them to corporal punishment marking their acceptance of sexual responsibilities

Generations Past Andrew Burton, Hélène Charton-Bigot, 2010-09-15 Contemporary Africa is demographically characterized above all else by its youthfulness In East Africa the median age of the population is now a striking 17.5 years and more than 65 percent of the population is age 24 or under This situation has attracted growing scholarly attention resulting in an important and rapidly expanding literature on the position of youth in African societies While the scholarship examining the contemporary role of youth in African societies is rich and growing the historical dimension has been largely neglected in the literature thus far Generations Past seeks to address this gap through a wide ranging selection of essays that covers an array of youth related themes in historical perspective Thirteen chapters

explore the historical dimensions of youth in nineteenth twentieth and twenty first century Ugandan Tanzanian and Kenyan societies Key themes running through the book include the analytical utility of youth as a social category intergenerational relations and the passage of time youth as a social and political problem sex and gender roles among East African youth and youth as historical agents of change The strong list of contributors includes prominent scholars of the region and the collection encompasses a good geographical spread of all three East African countries

Anticommunism in French Society and Politics, 1945-1953 Aaron Clift,2023-06-20 Anticommunism in French Society and Politics 1945 1953 evaluates the prevalence of anticommunism among the French population in 1945 to 1953 and examines its causes character and consequences through

a series of case studies on different segments of French society These include the scouting movement family organisations agricultural associations middle class groups and trade unions and other working class organisations Aaron Clift contends that anticommunism was more widespread and deeply rooted than previously believed and had a substantial impact on national politics and on these social groups and organisations Furthermore he argues that the study of anticommunism allows us a deeper understanding of the values they regarded as the most important to defend Although anticommunism was a diverse phenomenon this work identifies common discourses including portrayals of communism as a threat to the nation the colonial empire the traditional family private property religion the rural world and Western civilisation It also highlights common aims such as the rehabilitation of wartime collaborators and tactics such as the invocation of apoliticism While acknowledging the importance of the Cold War it rejects the assumption that anticommunism was an American import or foreign to French society and demonstrates links between anticommunism and anti Americanism It concludes that anticommunism drew its strength from the connection or even conflation of communism with perceived negative social changes that were seen to threaten traditional French civilisation interacting with the postwar international and domestic environment and the personal experiences of individual anticommunists

**Anglo-World and British Colonial Contexts, 1800-1950** Hugh Morrison, Mary Clare Martin, 2017-01-20 Drawing on examples from British world expressions of Christianity this collection further greater understanding of religion as a critical element of modern children s and young people s history It builds on emerging scholarship that challenges the view that religion had a solely negative impact on nineteenth and twentieth century children or that secularization is the only lens to apply to childhood and religion Putting forth the argument that religion was an abiding influence among British world children throughout the nineteenth and most of the twentieth centuries this volume places religion at the center of analysis and discussion At the same time it positions the religious factor within a broader social and cultural framework The essays focus on the historical contexts in which religion was formative for children in various British settings denoted as Anglo or colonial during the nineteenth and early to mid twentieth centuries These contexts include mission fields churches families Sunday schools camps schools and youth movements Together they are treated as sites in which religion contributed to identity formation albeit in different ways relating to such factors as gender race disability and denomination The contributors develop this subject for childhoods that were experienced largely but not exclusively outside the metropole in a diversity of geographical settings By extending the geographic range even within the British world it provides a more rounded perspective on children s global engagement with religion
