The Science and Politics of Racial Research William H. Tucker,1994 Unlike other critiques of the scientific literature on racial difference The Science and Politics of Racial Research argues that there has been no scientific purpose or value to the study of innate differences in ability between groups William Tucker shows how for more than a century scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences Tucker structures his work chronologically with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda He begins with the use of science to support slavery in the mid nineteenth century and ends with the effects of Jensenism in the 1970s Highlights include one chapter describing a little known but concerted attempt by a group of scientists to overturn the Brown v Board of Education decision on the basis of expert testimony about racial differences and another that presents a review of the eugenics movement in the twentieth century The author also considers how to balance the rights and responsibilities of scientists concluding that one generally neglected method is to strengthen the rights of research subjects

**A Social Psychology of Prejudice** Douglas W. Bethlehem,2015-06-19 Prejudice is a topic of major interest to psychologists and sociologists but had rarely been given the broad treatment its importance demanded Originally published in 1985 this title first introduces the term showing how it is related to other terms commonly used in psychology and the social sciences and explains simply and clearly what a scientific analysis must involve It then goes on to show how prejudice affects our reasoning and judgement in a wide variety of spheres in addition to race or ethnic attitudes Next it traces the development of prejudiced attitudes towards black people in Britain and the New World through the slave system and the slave trade with a brief look at the remarkably similar development of ethnic attitudes in South Africa at the time It then goes on to discuss the debate about race differences in intelligence showing simply and clearly what the statistical assumptions underlying the heritability hypothesis are Following that the psychological explanation of prejudice and principles explaining prejudice are spelled out the question of sex prejudice is dealt with and finally the extent of ethnic prejudice in Britain and the USA is discussed The final chapter is a summary of the general principles and conclusions discussed through the book This title provides a scientific and historical perspective on prejudice a thorough literature review and clear summarising principles of prejudice in a simple and straightforward style **Race, Social Class, and Individual Differences in I. Q., [New Studies of Old Issues]** ,1981 **Intelligence, Race, And Genetics** Frank Miele,2018-03-05 In a series of provocative conversations with Skeptic magazine Ssenior editor Frank Miele renowned University of California Berkeley psychologist Arthur R Jensen details the evolution of his thoughts on the nature of intelligence tracing an intellectual odyssey

that leads from the programs of the Great Society to the Bell Curve Wars and beyond Miele cross examines Jensen s views on general intelligence the g factor racial differences in IQ cultural bias in IQ tests and whether differences in IQ are due primarily to heredity or to remediable factors such as poverty and discrimination With characteristic frankness Jensen also presents his view of the proper role of scientific facts in establishing public policy such as Affirmative Action Jensenism the assertion that heredity plays an undeniably greater role than environmental factors in racial and other IQ differences has entered the dictionary and also made Jensen a bitterly controversial figure Nevertheless Intelligence Race and Genetics carefully underscores the dedicated lifetime of scrupulously scientific research that supports Jensen s conclusions *Race and Culture in Psychiatry (Psychology Revivals)* Suman Fernando,2014-10-14 As psychiatry has developed it has proved to be susceptible to the influence of contemporary social and political mores With its origins in nineteenth century Europe psychiatry evolved as an ethnocentric body of knowledge the vehicle of implicit and overt racism Originally published in 1988 this author however saw no reason why the contemporary psychiatrist should not challenge this ethnocentrism He provides a critical account of the development of psychiatry in relation to its cultural context and then examined contemporary practice of the time in the light of this development Throughout the book is informed by an awareness of issues of race and culture and of their difficult interactions the author emphasising both the frequency of racist attitudes and the very real cultural distinctions in our society distinctions that can be used to mask what are actually racist sentiments What emerges is not just a plea for an anti racist culture sensitive psychiatry but a blueprint for how this can be brought about He argued that the shift towards community work and social psychiatry could reorientate the profession by confronting it with its social setting and responsibilities This book represented a significant contribution to this literature for all mental health professionals and social scientists with an interest in this field at the time the author has gone on to write many more Biological and Neuropsychological Mechanisms Hayne Waring Reese,Michael D. Franzen,1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company **Intelligence and How to Get It: Why Schools and Cultures Count** Richard E. Nisbett,2010-02-08 Nisbett weighs in forcefully and articulately using a thoroughly appealing style to engage throughout Publishers Weekly Who are smarter Asians or Westerners Are there genetic explanations for group differences in test scores From the damning research of The Bell Curve to the more recent controversy surrounding geneticist James Watson s statements one factor has been consistently left out of the equation culture In the tradition of Stephen Jay Gould s The Mismeasure of Man world class social psychologist Richard E Nisbett takes on the idea of intelligence as biologically determined and impervious to culture with vast implications for the role of education as it relates to social and economic development Intelligence and How to Get It asserts that intellect is not primarily genetic but is principally determined by societal influences *Annals of Theoretical Psychology* Joseph R. Royce,Leendert P. Mos,2013-11-11 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A

major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate commentary. If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author. It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication. Nevertheless we do invite readers' commentaries on published materials. The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag. We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views elsewhere in print. K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982. We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground.

The Psychology of Social Class Michael Argyle, 1994. In *The Psychology of Social Class* leading social psychologist Michael Argyle provides a comprehensive account of psychological and other research into social class using data from Britain, the United States and elsewhere. By addressing differences in social class, the book broadens the perspective of social psychological research to examine such topics as the effect of achievement, motivation and other personality variables on social mobility and the effect of social class on health. After examining the historical development of class and the attempts to abolish it, Argyle describes the class system currently existing in Britain and compares it with others in the modern world. Included are discussions of psychological models of class and hierarchies in small groups and social organizations. A detailed account is provided of class differences in behavior and beliefs covering such aspects as marriage, friendship, speech style, personality, sexual behavior, crime, religion and leisure. Finally, Argyle examines the images people have of the class system, the effects of class on well-being and discusses possible explanations of class differences in terms of genetics, socialization, work experience, differences in lifestyle and the sheer effects of social status.

Intelligence, Heredity and Environment Robert J. Sternberg, Elena L. Grigorenko, 1997-01-28. The debate over nature versus nurture in relation to intelligence is not as clearly drawn as it was ten years ago when geneticists claimed that intelligence is innate while environmentalists claimed that culture is the major determining factor. Although the debate has not been resolved, it has been significantly refined. Robert Sternberg and Elena Grigorenko address the roles and interaction of nature and nurture in Intelligence, Heredity and Environment. This book provides a comprehensive, balanced, current survey of theory and research on the origins and transmission of human intelligence. The book is unique in the diversity of viewpoints it presents and its inclusion of the very most recent theories and findings. It highlights the search for genes associated with specific cognitive abilities, interactionist theories, cultural relativism, educational strategies, developmental perspectives, and fallacies of previous intelligence research.
