Despite the mythology of sport bringing people together and encouraging everyone to work collectively to success modern sport remains a site of exclusionary practices that operate on a number of levels Although sports participation is in some cases at least becoming more open and meritocratic at the management level it remains very homogenous dominated by western white middle aged able bodied men This has implications both for how sport develops and how it is experienced by different participant groups across all levels Critical studies of sport have revealed that rather than being a passive mechanism and merely reflecting inequality sport via social agents interactions with sporting spaces is actively involved in producing reproducing sustaining and indeed resisting various manifestations of inequality The experiences of marginalised groups can act as a resource for explaining contemporary political struggles over what sport means how it should be played and by whom and its place within wider society Central to this collection is the argument that the dynamics of cultural identities are contextually contingent influenced heavily by time and place and the extent to which they are embedded in the culture of their geographic location They also come to function differently within certain sites and institutions be it in one s everyday routine or leisure pursuits such as sport Among the themes and issues explored by the contributors to this volume are social inclusion and exclusion in relation to class race and ethnicity gender and sexuality social identities and authenticity social policy deviance and fandom This book was published as a special issue of Sport in Society *Sport and the Communities* Allan Edwards, David Hassan, 2016-01-08 Over the past three decades there has been widespread commitment to an understanding that sport can play a key role in community development The role of sport within communities has been promoted with a wide range of goals such as environmental considerations encouragement of civic pride enhancement of confidence and self esteem and development of social cohesion as well as the fostering of a fit and healthy workforce To address these issues a number of programmes have been funded and supported to develop the role of sport in communities worldwide and to increase participation and access to sport and physical activities in rural areas In addition we are witnessing the development of new sports communities through social media such as Facebook and My Space The concern is that we need to revisit the concept of community and sport and to investigate the current understanding of these terms in

view of the evolving role of sport in a range of national settings This book will present the platform upon which this process can be undertaken and offers a fundamental re evaluation of the relationship that currently exists between sport and communities throughout selected parts of the world This book was previously published as a special issue of Sport in Society

**The Cultural Politics of Lifestyle Sports** Belinda Wheaton, 2013-07-23 This important new study examines the changing place and meaning of lifestyle sports parkour surfing skateboarding kite surfing and others and asks whether they continue to pose a challenge to the dominant meanings and experience of sport and physical culture Drawing on a series of in depth empirical case studies the book offers a re evaluation of theoretical frameworks with which lifestyle sports have been understood and focuses on aspects of their cultural politics that have received little attention particularly the racialization of lifestyle sporting spaces Centrally it re assess the political potential of lifestyle sports considering if lifestyle sports cultures present alternative identities and spaces that challenge the dominant ideologies of sport and the broader politics of identity in the 21st century It explores a range of key contemporary themes in lifestyle sport including identity and the politics of difference commercialization and globalization sportscapes media discourse and lived reality risk and responsibility governance and regulation the racialization of lifestyle sports spaces lifestyle sports outside of the Global North the use of lifestyle sport to engage non privileged youth Casting new light on the significance of sport and sporting subcultures within contemporary society this book is essential reading for students or researcher working in the sociology of sport leisure studies or cultural studies
