higher offending and victimization rates than White people and with the overrepresentation of men and people of Color in the criminal legal system new theories are required that address these phenomena and that are devoid of stereotypical or debasing underpinnings Intersectionality and Criminology provides a comprehensive review of the need for and use of intersectionality in the study of crime criminality and the criminal legal system This is essential reading for academics and students researching and studying in the fields of crime criminal justice theoretical criminology and gender race and socioeconomic class **Handbook of Race-Ethnicity and Gender in Psychology** Marie L. Ferguson,2014-02-06 Multicultural aspects of psychology have received some attention in the literature in the last decade A number of texts currently address these significant concerns for example Counseling the Culturally Different Sue Handbook of Multicultural Counseling Poterotto et l 2009 and Handbook of Multicultural Counseling Competencies Pope Davis Coleman 2005 In their most recent editions several of these books address more nuanced complexities of diversity for example the intersections of gender or social class with race ethnicity Meanwhile other texts have addressed gender issues in psychology Handbook of Counseling Women Counseling Men with some attention paid to racial ethnic and other diversity concerns Clearly the progression of scholarship in this field reflects the importance of incorporating multiple aspects of diversity within psychology However no book currently exists that fully addresses the complexities of race ethnicity and gender together Better understanding of the dual impact of race ethnicity and gender on psychological functioning may lead to more effective conceptualizations of a number of mental health issues such as domestic violence addictions health related behaviors and achievement Exploring the impact of race ethnicity and gender also may provide a broader understanding of self in community as this affects individuals families and other social groups and work and career development Topics of interest may include identity development worldviews and belief systems parenting styles interventions for promoting resilience and persistence and strategies for enhancing more accurate diagnostic and treatment modalities Today s world is comprised of multiple and intersecting communities that remain in need of psychological models and interventions that support and promote both individual and collective mental health We believe that utilizing unidimensional conceptual models e g focusing solely on race ethnicity or gender no longer adequately addresses psychological concerns that are dynamic complex and multi faceted The proposed Handbook will focus on timely topics which historically have been under addressed for a number of diverse populations **Teaching Criminology at the Intersection** Rebecca M. Hayes,Kate Luther,Susan

history the book has added new theoretical perspectives as these have gained prominence New to this edition are chapters on critical and ultra realism and critical green criminology and discussions of zemiology critical race theory and quantum holographic criminology The authors have also expanded some theoretical frameworks that had previously been underdeveloped such as opportunity theory subcultural theory and social constructionism Essential Criminology contextualizes criminology in the globally interdependent 21st century addressing the crimes of terrorism global pandemics and climate change With its cutting edge updates illustrative real world examples and student friendly study tools including analytically comparable summary charts exposing each theory s ontological assumptions this text was designed primarily for undergraduate criminology courses but has also been adopted by community colleges and graduate programs in criminology sociology and political science *Introduction to Criminology* Pamela J. Schram, Joseph A. Schwartz, Stephen G. Tibbetts, 2023-10-24

If you are considering a career in any aspect of criminal justice and you want to know more about the motivations and socio psychological makeup of serious offenders then this book is for you *Introduction to Criminology Why Do They Do It* applies the dominant theories in the existing criminological literature as to why people commit crimes In addition we examine many recent as well as many hypothetical examples of serious crimes and we demonstrate applications of theory as to why the offenders did what they did While other textbooks do a decent job in discussing the basic theories as well as exploring the various types of crime our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity This is extremely important because most instructors never get to the latter typology chapters in a given semester or term So our approach is to incorporate them into the theoretical chapters in which they apply directly to the theories presented Our specific examples and true stories such as notable serial killings and other recent crimes in each chapter as well as our use of established theoretical models to explain the offenses is another primary distinction of this book Obviously this book is meant to be central to an introductory course in criminology but due to the emphasis on applied theoretical explanations it is also appropriate for higher level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice In it we have integrated true crimes and some hypothetical examples both on a general level such as in the Applying Crime to Theory sections and more specifically in the Why Do They Do It sections which often involve serial killings mass murderers or other notorious examples of offenders offending The subtitle of our book *Why Do They Do It* relates to our theme Our goal in writing this book was to apply established theories of crime which are often seen as abstract and hypothetical to real crimes that have occurred as well as to hypothetical ones that are quite likely to occur To this end we explore the various reasons for offending or the why they do it in various cases from the first documented serial killers in the United States the Harpe Brothers in the late 18th century to California cop killer spree killer Christopher Dorner in 2013 and then Payton S Gendron who massacred 10 Black shoppers at a grocery store in Buffalo New York in 2022 Importantly throughout these discussions

of actual crimes we will apply theories As you will see some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well Unlike other authors in this field we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter We strongly believe that by integrating discussions of such serious crimes all crimes previously identified by the FBI as Index or Part I offenses including murder rape robbery aggravated assault burglary motor vehicle theft larceny and arson as well as other crimes such as simple assault and driving under the influence into the theoretical chapters provides the best exploration of why people commit such offenses And the flip side is good as well by discussing offenses together with theories we show you how to apply theories toward explaining other instances of criminal behavior Again this goes back to our theme of why do they do it It demonstrates our goal Apply the appropriate theories for the specific crime *Perspectives on Community-Based Corrections* Justin C.
