fundamental questions of value are not always seen as central to the sociology of education. However, this book argues that they are pivotal and provides a sophisticated and engaging introduction to the field that is designed to open up these important debates. It draws attention to the many points of disagreement that exist between major thinkers in the sociology of education and the values on which their ideas are based. By involving readers in crucial questions about the potential contribution of sociology to education policies and practices, it aims to bridge the divide between education as it is talked about by academics and the concerns of policymakers and educators who have to make practical decisions about what is to be done. Chapter by chapter, the book introduces competing approaches in the sociology of education: structural functionalism, symbolic interactionism, Marxism, feminism, critical race theory, and poststructuralism. It shows how these can be applied to major themes such as social reproduction, the politics of knowledge, multicultural education, identity, and teachers' work. Throughout, the authors emphasise the importance of understanding social and educational values and the ways in which these underpin and impact upon the work of both academics and educators.

**EBOOK: Girls And Education 3-16: Continuing Concerns, New Agendas** Carolyn Jackson, Carrie Paechter, Emma Renold, 2010-01-16. This is a book to own, read, and re-read for its insights and which should then provoke us to act so that all children at school are able to enjoy and benefit from education. Professor Debbie Epstein, Cardiff University, UK. Editor, Gender and Education. This excellent book offers evidence from a rich vein of research covering all aspects of girls and young women's experiences of education in and out of school and is therefore an absolute must for all involved in teaching, learning, researching, and policy making on gender. Professor Gaby Weiner, University of Edinburgh, UK. Countering claims that we live in post-feminist times in which girls have it all and can do and be whatever they like, this book explores some of the current concerns of and about girls today. Issues relating to girls' schooling and femininities have been sidelined and depoliticised in recent education agendas. Yet questions and concerns relating to schoolgirls' lives and experiences deserve immediate attention. Not all girls are academically successful; many girls face exclusion in schools; career aspirations are still gendered; rates of smoking and drinking alcohol are high amongst some groups of girls. With contributions from leading researchers in gender and education, this book draws on cutting-edge research to consider ongoing problems and explore new agendas. Includes contributions relating to the entire 3-16 year age range. Considers both the within and out of school experiences of girls and locates them within wider debates about gender anxieties in contemporary education. This topical collection highlights the main issues faced by girls in Britain today and endeavours to put girls back on the educational agenda. It is essential reading for students, academics, and researchers in education, sociology, and girls' studies, as well as for school teachers and education policy makers.
