**Always, Rachel** Rachel Carson, Dorothy E. Freeman, 2022-03-08 These letters between the pioneering environmentalist and her beloved friend reveal a vibrant caring woman behind the scientist Los Angeles Times Rachel Carson author of *The Silent Spring* has been celebrated as the pioneer of the modern environmental movement Although she wrote no autobiography she did leave letters and those she exchanged sometimes daily with Dorothy Freeman some 750 of which are collected here are perhaps more satisfying than an account of her own life In 1953 Carson became Freeman's summer neighbor on Southport Island ME The two discovered a shared love for the natural world their descriptions of the arrival of spring or the song of a hermit thrush are lyrical but their friendship quickly blossomed as each realized she had found in the other a kindred spirit To read this collection is like eavesdropping on an extended conversation that mixes the mundane events of the two women's family lives with details of Carson's research and writing and later her breast cancer Few who read these letters will forget these remarkable women and their even more remarkable bond Publishers Weekly Darting fresh sensuous pleasingly elliptical at times these letters also serve to tether the increasingly deified Carson firmly to earth just where she'd want to be Kirkus Reviews starred review It is not often that a collection of letters reveals character emotional

depth personality indeed intellect and talent as well as a full biography might these letters do all that The New York Times Book Review Provides insight into the creative process and a look into the daily lives of two intelligent perceptive women whose family responsibilities were at times almost crushing Library Journal Dotted with vivid observations of the natural world and perceptive commentary on friendship family fame and life itself Always Rachel will appeal to readers interested in biography and women s studies as well as those drawn to nature writing and the history of the environmental movement
