Racial Realities In Europe:

Racial Realities in Europe Lothrop Stoddard, 1924 *Racial Realities in Europe* T Lothrop Stoddard, 2019-05-24 A sweeping survey of the physical characteristics and geographical placement of the main European sub races as at the beginning of the twentieth century prepared by T Lothrop Stoddard one of America s foremost racial thinkers and writers more famous for his work *The Rising Tide of Color* Adopting the broad categories of Nordic Alpine and Mediterranean the author delves into a brief history of each sub group their characteristics and reveals how the nations of Europe acquired their native stock and racial make up The scientific discoveries of the past generation have clearly revealed the vital importance of the racial factor in human affairs Race hitherto disregarded or minimized is now seen to be the basic element in the destinies of peoples This momentous discovery makes necessary a re interpretation of both history and current events This book attempts a brief survey of Europe along these lines Roughly speaking the European races spread horizontally in three broad bands across the European continent To the north lie the Nordics centering about the Baltic Sea and stretching from the British Isles to Western Russia To the south lie the Mediterraneans centering about the Mediterranean Sea as the Nordics do about the Baltic Between the Nordics and Mediterraneans thrusts the Alpine race stretching from Russia and the Near East clear across mid Europe until its outposts reach the Atlantic Ocean in Western France and Northern Spain These three races differ markedly from one another not merely in physical appearance but also in intellectual and emotional qualities Now updated with a 32 page appendix which is a fully updated DNA map of Europe compiled by Arthur Kemp from more than 70 scientific papers and studies into an easy to read format with charts and tables This appendix reveals the exact proportions of European and non European DNA in each European nation It also includes a section on what DNA reveals about the Khazar Jewish theory Contents Foreword I Racial Realities in Europe II Kindred Britain III The Nordic North IV Composite France V The Mediterranean South VI Alpinized Germany VII Disrupted Central Europe VIII The Alpine East IX The Balkan Flux X The New Realism Of Science Index Maps Present Distribution of European Races Physical Map of Europe Language Map of Europe Appendix A DNA Survey of Europe *Racial realities in Europe* Lothrop Stoddard, 1927 **Racial Realities in Europe, by Lothrop Stoddard** Lothrop Stoddard, 1925 **Racial Realities in Europe** T. Stoddard, Arthur Kemp, 2013-07-28 We think of Europe in units of nations and of those nations as homogenous and we take to little account of race and race mixtures That we cannot understand Europe until with know and thoroughly comprehend its racial background is the basis of this absorbing book It begins with a clear account of the distinction of the various white races in Europe before moving onto a study of the racial composition of the individual countries which provides an explanation of their policies Now updated with a 32 page appendix which is a fully updated DNA map of Europe compiled by Arthur Kemp from more than 70 scientific papers and studies into an easy to read format with charts and tables This appendix reveals the exact proportions of European and non European DNA in each European nation Also includes a section on what DNA reveals about the Khazar

Jewish theory This appendix confirms the book's thesis about racial mixing leading to the destruction of European civilization
