Racism In Europe 1870 2000:

Racism in Europe Neil MacMaster, 2017-03-08 The study of modern racism has tended to treat anti-Semitism and anti-black racism as separate and unconnected phenomena. This innovative study argues that a full understanding of the origins and development of racism in Europe after 1870 needs to examine the structure and interrelationships between the two dominant forms of prejudice. Contrary to expectation, anti-black racism was not confined to the colonial maritime nations of western Europe but perpetrated even the rural societies of central and eastern Europe. Likewise, anti-Semitism could flourish even in the almost total absence of Jews. MacMaster explores the conditions under which modern political movements faced with the crisis of modernity began to draw upon and mobilise the negative stereotypes that through the development of the mass media had become almost universal features of popular culture. By weaving together the changing spatial and temporal dimensions of anti-Semitic and anti-black prejudice, the study provides a fresh and more global framework for understanding modern racism.

Racism and Anti-Racism in Europe Alana Lentin, 2004-06-20 Remarkable a major contribution to our understanding and handling of one of the crucial contemporary issues that acquires more gravity by the day. Zygmunt Bauman. This is an in-depth sociological study of the phenomenon of anti-racism as both political discourse and social movement practice in western Europe. Lentin develops a comparative study of anti-racism in Britain, France, Italy, and Ireland. While race and racism have been submitted to many profound analyses, anti-racism has often been dealt with as either the mere opposite of racism or as a theme for prescriptives or polemics by those concerned with the persistence of racist discrimination. By contrast, this book views anti-racism as a variety of discourses that are central to the understanding of the politics of modern states. Examining anti-racism gives us insights not only into current debates on citizenship, immigration, and Europeanisation but it also crucially assists us in understanding the nature of race, racism, and racialisation themselves. At a time of mounting state racism against asylum seekers, migrants, and refugees throughout Europe and beyond, this book provides a much-needed exploration of the discourse of anti-racism that shapes

hatreds This innovative and engaging book explores the sources of Europe's culture based divide arguing that the idea of two Europes is grounded both in reality and myth The accession process that brought a dozen new members into the European Union after 2004 has highlighted the persisting gulf between old and new Europe despite the many physical barriers that have crumbled Ray Taras examines the treaties political rhetoric citizen attitudes and literary narratives of belonging and separation that both bind and fray the fabric of Europe Throughout this interdisciplinary work provides a comprehensive hard hitting and unabashed review of how enlarged Europe embraces contrasting understandings of its political home

Europe 1850-1914 Jonathan Sperber, 2014-01-14 This innovative survey of European history from the middle of the nineteenth century to the outbreak of the First World War tells the story of an era of outward tranquillity that was also a period of economic growth social transformation political contention and scientific and artistic innovation During these years the foundations of our present urban industrial society were laid the five Great Powers vied in peaceful and violent fashion for dominance in Europe and throughout the world and the darker forces that were to dominate the twentieth century violent nationalism totalitarianism racism ethnic cleansing began to make themselves felt Jonathan Sperber sets out developments in this period across the entire European continent from the Atlantic to the Urals from the Baltic to the Mediterranean To help students of European history grasp the main dynamics of the period he divides the book into three overlapping sections covering the periods from 1850-75 1871-95 and 1890-1914 In each period he identifies developments and tendencies that were common in varying degrees to the whole of Europe while also pointing the unique qualities of specific regions and individual countries Throughout his argument is supported by illustrative material tables charts case studies and other explanatory features and there is a detailed bibliography to help students to explore further in those areas that interest them

The Celluloid Atlantic Saverio Giovacchini, 2025-02-01 Offers a fresh look at American and Italian cinema in the postwar period The Celluloid Atlantic changes the way we look at American and Italian cinema in the postwar period In the thirty years following World War II American and Italian film industries came to be an integrated transnational unit rather than two separate nation based entities Written in jargon free prose and based on previously unexplored archival sources this book revisits the history of Neorealism World War II combat cinema the Western all Italiana and the career of John Kitzmiller the African American star who made Italy his home and was the first person of color to win the Best Actor Award at the Cannes Film Festival The Celluloid Atlantic makes the trailblazing argument that culturally hybrid genres like the so called spaghetti Western were less the exceptions than the norm Giovacchini argues that the waning of the Celluloid Atlantic in the early 1970s was due to the economic policies of the first Nixon administration specifically its important but largely neglected Revenue Act of 1971 as well as to the ideological debates between Europeans and Americans that intensified during the American intervention in Vietnam

The African Diaspora Patrick Manning, 2010-03-05 Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe Asia and

the Americas In joining these stories he shows how the waters of the Atlantic Ocean the Mediterranean Sea and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shaping across the globe Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community He tracks discourses on race changes in economic circumstance the evolving character of family life and the growth of popular culture He underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity Inclusive and far reaching The African Diaspora proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account *Reflective Teaching of History 11-18* Rob Phillips,2002-10-11 This series of textbooks is aimed at teacher training students and comprises two concerns the practice of teaching and how to use theory and research findings to improve that practice and how to meet the TTA standards whilst placing them in a wider context This comprehensive textbook is an accessible guide to all those who are new to the profession of teaching history Covering all aspects of the job from planning through to teaching and assessment Rob Phillips provides constructive practical advice to help subject teachers become more effective in their work

Colonialism and the Jews in German History Stefan Vogt,2022-06-16 Colonialism and the Jews in German History brings together new and path breaking studies on the historical relationship between colonialism and the Jews in Germany The book considers the mutual influences on the situation of the Jews in Germany including attitudes towards Jews and anti Semitism but also Jewish self conceptions and the ideology and politics of German colonialism The contributors discuss the ways in which colonial ideology and practice have affected the position of the Jews in Germany and the relationship between anti Semitism and colonial racism In doing so the volume introduces German colonialism as a relevant context for German Jewish history and it expands the perspective on German colonial history significantly by considering Jews both as distinct objects and also as agents within the field of German colonialism The volume includes studies on the pre colonial era the phase of active German colonialism since the 1880s and the time after Germany lost its colonies in the First World War All these studies testify to the fact that German Jewish history takes on additional significance if seen as part of a global history of collective relationships *The New Crusades* Emran Qureshi,Michael A. Sells,2003-11-26 Not since the Crusades of the Middle Ages has Islam evoked the degree of fear hostility and ethnic and religious stereotyping that is evident throughout Western culture today As conflicts continue to proliferate around the globe the perception of a colossal unyielding and unavoidable struggle between Islam and the West has intensified These numerous conflicts both actual and ideological have revived fears of an ongoing clash of civilizations an intractable and irreconcilable conflict of values between Western cultures and an Islam that is portrayed as hostile and alien The New Crusades takes head on the idea of an emergent Cold War between Islam and the West It explores the historical political and institutional forces that have raised the specter of a

threatening and monolithic Muslim enemy and provides a nuanced critique of much received wisdom on the topic particularly the clash of civilizations theory Bringing together twelve of the most influential thinkers in Middle Eastern and religious studies including Edward Said Roy Mottahedeh and Fatema Mernissi this timely collection confronts such depictions of the Arab Islamic world showing their inner workings and how they both empower and shield from scrutiny Islamic radicals who operate from similar paradigms of inevitable and absolute conflict *Immigration and Citizenship in Japan* Erin Aeran Chung,2010-03-31 Japan is currently the only advanced industrial democracy with a fourth generation immigrant problem As other industrialized countries face the challenges of incorporating post war immigrants Japan continues to struggle with the incorporation of pre war immigrants and their descendants Whereas others have focused on international norms domestic institutions and recent immigration this book argues that contemporary immigration and citizenship politics in Japan reflect the strategic interaction between state efforts to control immigration and grassroots movements by multi generational Korean resident activists to gain rights and recognition specifically as permanently settled foreign residents of Japan Based on in depth interviews and fieldwork conducted in Tokyo Kawasaki and Osaka this book aims to further our understanding of democratic inclusion in Japan by analyzing how those who are formally excluded from the political process voice their interests and what factors contribute to the effective representation of those interests in public debate and policy

Transnational Spaces and Identities in the Francophone World Hafid Gafa ti,Patricia M. E. Lorcin,David G. Troyansky,2009-07-01 The dissolution of the French Empire and the ensuing rush of immigration have led to the formation of diasporas and immigrant cultures that have transformed French society and the immigrants themselves Transnational Spaces and Identities in the Francophone World examines the impact of this postcolonial immigration on identity in France and in the Francophone world which has encompassed parts of Africa the Middle East Southeast Asia and the Americas Immigrants bear cultural traditions within themselves transform host communities and are in turn transformed These migrations necessarily complicate ideals of national literature culture and history forcing a reexamination and a rearticulation of these ideals Exploring a variety of texts informed by these transnational conceptions of identity and space the contributors to this volume reveal the vitality of Francophone studies within a broad range of disciplines periods and settings They remind us that the idea and reality of Francophonie is not a late twentieth century phenomenon but something that grows out of long term interactions between colonizer and colonized and between peoples of different nationalities ethnicities and religions Truly interdisciplinary this collection engages conceptions of identity with respect to their physical geographic ethnic and imagined realities *Flamenco Nation* Sandie Holguín,2019-06-11 How did flamenco a song and dance form associated with both a despised ethnic minority in Spain and a region frequently derided by Spaniards become so inexorably tied to the country s culture Sandie Holgu n focuses on the history of the form and how reactions to the performances transformed from disgust to reverence over the course of two centuries Holgu n brings forth an important interplay between regional

nationalists and image makers actively involved in building a tourist industry Soon they realized flamenco performances could be turned into a folkloric attraction that could stimulate the economy Tourists and Spaniards alike began to cultivate flamenco as a representation of the country's national identity This study reveals not only how Spain designed and promoted its own symbol but also how this cultural form took on a life of its own **Vanguardism** Phillip W. Gray,2019-12-06

Providing an innovative conceptualization to extremist political movements founded upon world historic populations and vanguard party organizations Vanguardism sets out a new path in investigating the intellectual and historical influences that created extremist politics the totalitarian movements and regimes of the twentieth century and a framework for interpreting extremism in the present Expanding its view across the turbulent intellectual currents of the nineteenth century Philip W Gray illustrates how these ideas shaped the shared ideational and organizational structures that would develop into Leninism Fascism and Nazism in the early twentieth century Moving beyond the Second World War the book explicates how vanguardism did not vanish with the war's conclusion but was modified throughout the period of national liberation movements and Western extremist groups over the ensuing decades Concluding in the present with an eye to the future Gray presents a framework for comprehending the extremist movement of today and how organizational shifts can give us clues to the forms of totalitarian politics of tomorrow Original and provocative Vanguardism will become essential reading for everyone looking to understand totalitarianism and extremist politics of our time **Singing Like Germans** Kira

Thurman,2021-10-15 In Singing Like Germans Kira Thurman tells the sweeping story of Black musicians in German speaking Europe over more than a century Thurman brings to life the incredible musical interactions and transnational collaborations among people of African descent and white Germans and Austrians Through this compelling history she explores how people reinforced or challenged racial identities in the concert hall Throughout the nineteenth and twentieth centuries audiences assumed the categories of Blackness and Germanness were mutually exclusive Yet on attending a performance of German music by a Black musician many listeners were surprised to discover that German identity is not a biological marker but something that could be learned performed and mastered While Germans and Austrians located their national identity in music championing composers such as Bach Beethoven and Brahms as national heroes the performance of their works by Black musicians complicated the public's understanding of who had the right to play them Audiences wavered between seeing these musicians as the rightful heirs of Austro-German musical culture and dangerous outsiders to it Thurman explores the tension between the supposedly transcendental powers of classical music and the global conversations that developed about who could perform it An interdisciplinary and transatlantic history Singing Like Germans suggests that listening to music is not a passive experience but an active process where racial and gendered categories are constantly made and unmade *Populating the Future* Britt Johanne Farstad,2023-07-19 Speculative fiction opens doors for imagining beyond what is possible conventional or acceptable Speculative fiction has an acute ear for the social the scientific and for

political developments and change all of which are prominent topics Reproduction and parenthood are pertinent social questions that are constantly renegotiated in various arenas By investigating representations of family making and reproduction in speculative fiction the research presented in *Populating the Future Families and Reproduction in Speculative Fiction* not only adds to the field of speculative fiction scholarship but also contributes to the more general discussion about reproduction and parenting Speculative fiction operates as thought laboratories that make connections between discourses visible It highlights power structures that can be difficult to detach and represents difficult and abstract issues more concretely As such speculative fiction demonstrates the complex entanglement of reproduction with issues of gender power and agency By facilitating thought experiments and illustrating alternatives speculative fiction also enables the representation of new family structures and reproductive technologies thus paving the way for discussions about various practices and their possible consequences Due to its multidisciplinary approach this book will be of value to scholars and students of various disciplines such as literature studies philosophy ethics political science the social sciences and gender studies It will also be a useful resource in teacher training programmes as well as to a more general audience interested in speculative literature politics society gender and ethics

Africa and the Shaping of International Human Rights Derrick M. Nault, 2020-12-17 Africa throughout its postcolonial history has been plagued by human rights abuses ranging from intolerance of political dissent to heinous crimes such as genocide Some observers consequently have gone so far as to suggest that human rights are a concept alien to African cultures The International Criminal Court ICC's focus on Africa in recent years has reinforced the region's reputation as a hotspot for

human rights violations But despite Africa's notoriety concerning human rights Africa and the Shaping of International Human Rights argues that the continent has been pivotal in helping to shape contemporary human rights norms and practices Challenging prevailing Eurocentric interpretations of human rights origins and evolution it demonstrates that from the colonial era to the present Africa's peoples have drawn attention to and prompted novel ways of thinking about human rights through their encounters with the world at large Beginning with the depredations of King Leopold II in the Congo Free State in the 1880s and ending with the ICC's current activities in Africa it reveals how African events personalities groups and nations have influenced the trajectory of human rights history in intriguing and critical ways in the end enlarging and universalizing a major discourse of our time
