Wasserman,2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics Blood and Smoke Charles Leerhsen,2012-05-22 One hundred years ago 40 cars lined up for the first Indianapolis 500 We are still waiting to find out who won The Indy 500 was created to showcase the controversial new sport of automobile racing which was sweeping the country Daring young men were driving automobiles at the astonishing speed of 75 miles per hour testing themselves and their vehicles With no seat belts hard

helmets or roll bars the dangers were enormous When the Indianapolis Motor Speedway opened in 1909 seven people were killed some of them spectators Oil slicked surfaces clouds of smoke exploding tires and flying grit all made driving extremely hazardous especially with the open cockpit windshield less vehicles Bookmakers offered bets not only on who might win but who might survive But this book is about more than a race it is the story of America at the dawn of the automobile age a country in love with speed danger and spectacle From publisher description
