THE MAN AND HIS IDEAS

"I'm very determined.
If I decide that something
is worth doing, then I'll put
my heart and soul to it.

The whole ground can be
against me, but if I know
it is right, I'll do it. That's
the business of a leader."

Nuclear Madness Ira Chernus, 1991-01-01 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of four major theorists into the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton's own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that

Healing Personal Psychology Jasenn Zaejian, 2012-07-10 The mental health professions are responsible for creating and maintaining a folie a deux or shared public delusion that their intention is to heal On close inspection we see that the primary function of mental health professionals is to serve as moral arbiters of human behavior The legislature has granted clinical psychology and psychiatry the legal rights to define certain behaviors as mental illness Behaviors are defined as mental illness by morally tinged personal clinical opinion Cleverly hidden from the public is the fact that the concept of mental illness has never been established by rigorous science to qualify as an illness or disease The concept of mental illness continues to be created or invented by selected moral judgments and committee discussions not science Healing Personal Psychology presents an historical line of development of psychology and psychiatry from its roots in 19th Century German authoritarianism and oppression to the present state of the field where little has changed The clinical gaze is the bedrock of the professions Therein lies the failure of the mental health professions to effectively heal Mainstream clinical psychology and psychiatry by their very natures engage in some of the most repressive practices in modern society Supporting the thesis of this failure with factual references we are taken on an experiential journey through the system to see the devastation mental health treatment has caused by the creation of disease including central nervous system motor neuron and organ diseases found in different studies to range between 10% 75% of all those treated Not to mention the personal ruin caused for millions of people every year by effectively eliminating their freedom of choice to engage in a pleasurable life existence Strategic change exercises effective in healing a range of serious difficulties are presented as a solution to this devastation Valuable resources for healing from surprising sources are illustrated with references for daily practice The author brings more than 30 years of

experience to bear in pointing towards a healthy way out This book can be utilized by professionals and the public both as an instructive textbook on alternative healing approaches for psychosis depression anxiety fears phobias obsessive or compulsive behaviors trauma or post traumatic related difficulties and as a resource that documents the system of oppression and inconsistent level of competence in the clinical psychology and psychiatry professions
