Education and Equality of Opportunity Fred A. Lazin, N. Jayaram, Matt Evans, 2012-07-10 The movement to broaden access to public universities the dominant strategy during the 1970s and 1980s has largely shifted to enable the marketplace rather than the government to shape the contours of higher education Government funding is being reduced affirmative action and other programs designed to insure broader access are in decline and personal fulfillment is replacing a public good designed to insure greater equality of opportunities This book explores the impact of diminishing government resources and expanding market forces in developing and developed countries to either foster or lessen equality of opportunities in higher education for different racial ethnic religious and gender groupings What are the consequences of a market driven higher education for student access teaching and scholarship Through case studies this book explores issues such as access of minority groups within the larger societies the place of foreign students in a national system and access for students with mental health difficulties and evaluates the success of funding schemes designed to expand opportunities and access The research provides an interesting contrast of the diversity and uniqueness of higher education in the United States France Australia India Israel South Korea The Netherlands Ghana and several other countries while at the same time revealing surprising commonalities These studies reveal world wide trends in higher education including a cutback in government financing a decline in access and a receding of affirmative action This book is an important addition to the literature on higher education during the age of globalization and the decline of government funding of higher education The studies provide important data about the current situation in higher education in countries around the world *Leading America's*

Branch Campuses Samuel Schuman, 2009-06-16 Branch campuses are a growing and vital segment of the American higher education community But these campuses and the particular challenges of leading them have received far less attention than other types of institutions *Leading America's Branch Campuses* remedies this by providing focused pragmatic advice by experienced branch campus professionals across a very broad range of leadership issues These include areas such as curriculum system relations fund raising student affairs athletics public relations faculty issues communication internal and external program creation strategic planning campus organization and assessment Chapter contributors include campus presidents chancellors provosts deans program directors and faculty members They represent two year baccalaureate and

graduate institutions and span the nation from Florida to Washington State Dr Schuman's style is direct and jargon free and he emphasizes practical issues more than abstract theories

Piecing Together the Student Success Puzzle: Research, Propositions, and Recommendations George D. Kuh, Jillian Kinzie, Jennifer A. Buckley, Brian K. Bridges, John C. Hayek, 2011-10-13 Creating the conditions that foster student success in college has never been more important As many as four fifths of high school graduates need some form of postsecondary education to be economically self sufficient and manage the increasingly complex social political and cultural issues of the 21st century But about 40 percent of those who start college fail to earn a degree within 6 or 8 years an unacceptably low number This report examines the complicated array of social economic cultural and educational factors related to student success in college defined as academic achievement engagement in educationally purposeful activities satisfaction acquisition of desired knowledge skills and competencies persistence and attainment of educational objectives Although the trajectory for academic success in college is established long before students matriculate most institutions can do more than they are at present to shape how students prepared for college and they they engage in productive activities after they arrive This is the 5th issue of the 32nd volume of the Jossey Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

research that must be synthesized to enhance understanding of college's effects. *How College Affects Students* compiles, organizes, and distills this information in one place and makes it available to research and practitioner audiences. Volume 3 provides insight on the past decade with the expert analysis characteristic of this seminal work.

Using Evidence of Student Learning to Improve Higher Education George D. Kuh, Stanley O. Ikenberry, Natasha A. Jankowski, Timothy Reese Cain, Peter T. Ewell, Pat Hutchings, Jillian Kinzie, 2015-01-20

American higher education needs a major reframing of student learning outcomes assessment. Dynamic changes are underway in American higher education. New providers, emerging technologies, cost concerns, student debt, and nagging doubts about quality all call out the need for institutions to show evidence of student learning. From scholars at the National Institute for Learning Outcomes Assessment (NILOA), *Using Evidence of Student Learning to Improve Higher Education* presents a reframed conception and approach to student learning outcomes assessment. The authors explain why it is counterproductive to view collecting and using evidence of student accomplishment as primarily a compliance activity. Today's circumstances demand a fresh and more strategic approach to the processes by which evidence about student learning is obtained and used to inform efforts to improve teaching, learning, and decision making. Whether you're in the classroom, an administrative office, or on an assessment committee, data about what students know and are able to do are critical for guiding changes that are needed in institutional policies and practices to improve student learning and success. Use this book to understand how and why student learning outcomes assessment can enhance student accomplishment and increase institutional effectiveness. Shift the view of assessment from being externally driven to internally motivated. Learn how assessment results can help inform decision making. Use assessment data to manage change and improve student success. Gauging student learning is necessary if institutions are to prepare students to meet the 21st century needs of employers and live an economically independent, civically responsible life. For assessment professionals and educational leaders, *Using Evidence of Student Learning to Improve Higher Education* offers both a compelling rationale and practical advice for making student learning outcomes assessment more effective and efficient.

The State of College Access and Completion Laura W. Perna, Anthony Jones, 2013-07-18

Despite decades of substantial investments by the federal government, state governments, colleges and universities, and private foundations, students from low-income families as well as racial and ethnic minority groups continue to have substantially lower levels of postsecondary educational attainment than individuals from other groups. *The State of College Access and Completion* draws together leading researchers nationwide to summarize the state of college access and success and to provide recommendations for how institutional leaders and policymakers can effectively improve the entire spectrum of college access and completion. Springboarding from a seminar series organized by the Advisory Committee on Student Financial Assistance, chapter authors explore what is known and not known from existing research about how to improve student success. This much-needed book calls explicit attention to the state of college access and success not only for traditional college-age students but also for the

substantial and growing number of nontraditional students Describing trends in various outcomes along the pathway from college access to completion this volume documents persisting gaps in outcomes based on students demographic characteristics and offers recommendations for strategies to raise student attainment Graduate students scholars and researchers in higher education will find The State of College Access and Completion to be an important and timely resource
