SirReadaLot.org We all know of women of great vision, women whose efforts and accomplishments have had a major impact on the arts, politics, women's rights, sports, or science. But often we may not understand how they became such powerful agents of change and what sorts of questions we should ask of their pasts to understand how the trajectories of their lives were formed. In this extraordinary textbook, leading experts cast new light on the role of circumstance, accomplishments, and personality in the development of various twentieth-century women of vision. This is a brand new life course approach to understanding female leaders and gives valuable insight into the lives of such eminent women as Rachel Carson, Evelyn Gentry Hooker, Georgia O'Keeffe, Eleanor Roosevelt, Babe Didrikson Zaharias, Ella Fitzgerald, Alice Paul, Lucille Ball, and many others. Study questions and exercises at the end of each chapter further enhance the text. *Women of Vision* will serve as the springboard for exploration of how the psychologies of individual human lives affect their life course and a galvanizing step for many more future women of vision and leadership.

A Natural History of Nature Writing Frank Stewart, 2012-07-11 *A Natural History of Nature Writing* is a penetrating overview of the origins and development of a uniquely American literature. Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries, including Henry D. Thoreau, the father of American nature writing; John Burroughs, a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form; John Muir, founder of Sierra Club, who celebrated the wilderness of the Far West as few before him; Aldo Leopold, a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants; Rachel Carson, a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems; Edward Abbey, an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes. Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view. Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty, nature writers have had a profound effect on American culture and politics. *A Natural History of Nature Writing* is an insightful examination of an important body of American literature.

A Passion for This Earth Michelle Benjamin, 2009-07-01 David Suzuki's lifelong work as an environmentalist, naturalist, and scientist have influenced countless others in their fight to save the planet. 20 such devotees of them have contributed to this inspiring collection. These journalists, scientists, writers, and environmentalists have taken their enthusiasm for Suzuki's philosophy and funneled it into their own personal recollections, manifestos, and essays. Rick Bass describes his love for the Yaak Valley in Montana. Richard Mabey takes readers to a moonlit May evening in Suffolk. David Helvarg tells us of a stirring seaside memory from his childhood. No matter what journey these writers take us on, the unifying theme of their work is always the same: a deep and abiding love of nature, inspired and shared by David Suzuki.

Encyclopedia of Environment and Society Paul Robbins, 2007-08-27 As befits the topic, this beautifully packaged, wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists. A helpful reader's guide groups topics like agriculture, conservation, and ecology; movements and regulations; politics; pollution; and society. A resource guide, chronology, glossary, and list of the UN's economic indicators complete the set. Library Journal: this important work gives a well-focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future, both for its content and as a yardstick to measure progress toward sustainability and conservation. Summing Up: Recommended. Undergraduates and general readers. CHOICE Booklist Editors' Choice 2008. This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues, which should mean just about all. Booklist Starred Review. Where does the environment leave off and society begin? When expanding production and consumption drives greenhouse gas emissions that warm the planet, which in turn influence the conditions of economic expansion, it is unclear where the climate ends and the economy begins. This fact is not new to our era; however, our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece. As a result, in the last decade, there has been an unprecedented explosion of new concepts, theories, facts, and techniques that follow from such an understanding. The Encyclopedia of Environment and Society brings together multiplying issues, concepts, theories, examples, problems, and policies with the goal of clearly explicating an emerging way of thinking about people and nature. With more than 1,200 entries written by experts from incredibly diverse fields, this innovative resource is a first step toward diving into the deep pool of emerging knowledge. The five volumes of this Encyclopedia represent more than a catalogue of terms. Rather, they capture the spirit of the moment, a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio-environmental issues. Key Features: Examines many new ideas about how the world works, what creates the daunting problems of our time, and how such issues might be addressed, whether by regulation, markets, or
