communities across the world The diverse perspectives syntheses and state of the art natural and social sciences contributions are led by past and current research fellows and principal investigators of the Nereus Program network This includes members at 17 leading research institutes addressing themes such as oceanography biodiversity fisheries mariculture production economics pollution public health and marine policy This book is a comprehensive resource for senior undergraduate and postgraduate readers studying social and natural science as well as practitioners working in the field of natural resources management and marine conservation Provides a synthesis of our knowledge on the future state of the oceans Includes recommendations on how to move forwards Highlights key social aspects linked to ocean ecosystems including health equity and sovereignty

The World in Which We Occur Neil W. Browne, 2007-10-31 Understanding our environment American philosopher John Dewey considered all human endeavors to be continuous with the natural world In his writings particularly *Art as Experience* 1934 Dewey insists on the primacy of the environment in aesthetic experience Dewey's conception of environment includes both the natural and the man made Neil Browne highlights this notion in order to define what he terms pragmatist ecology a practice rooted in the interface of the cultural and the natural which he finds to be a significant feature of some of the most important ecological writing of the last century To fully understand human involvement in the natural world Browne argues disciplinary boundaries must be opened up This is primarily important between the arts and science with profound implications for the practice of democracy The degradation of the physical environment and democratic decay for Browne are rooted in the same problem our persistent belief that humans are somehow separate from their physical environment Browne probes the work of a number of major American writers through the lens of Dewey's philosophy Among other texts he examines John Muir's *My First Summer in the Sierra* 1911 *Sea of Cortez* 1941 by John Steinbeck and Edward Ricketts Rachel Carson's three books about the sea *Under the Sea Wind* 1941 *The Sea Around Us* 1951 and *The Edge of the Sea* 1955 John Haines's *The Stars the Snow the Fire* 1989 Tarry Lopez's *Arctic Dreams* 1986 and Terry Tempest Williams's *Refuge* 1991 Together these texts with their combinations of scientific observation and personal meditation challenge the dichotomies to which we've become accustomed and affirm the values of a pragmatist ecology one in which ecological and democratic values go hand in hand

Routledge Handbook of Ocean Resources and Management Hance D. Smith, Juan Luis Suárez de Vivero, Tundi S. Agardy, 2015-10-16 This comprehensive handbook provides a global overview of ocean resources and management by focusing on critical issues relating to human development and the marine environment their interrelationships as expressed through the uses of the sea as a resource and the regional expression of these themes The underlying approach is geographical with prominence given to the biosphere political arrangements and regional patterns all considered to be especially crucial to the human understanding required for the use and management of the

world's oceans Part one addresses key themes in our knowledge of relationships between people and the sea on a global scale including economic and political issues and understanding and managing marine environments Part two provides a systematic review of the uses of the sea grouped into food ocean space materials and energy and the sea as an environmental resource Part three on the geography of the sea considers management strategies especially related to the state system and regional management developments in both core economic regions and the developing periphery Chapter 23 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9780203115398.ch23> [Applying Benford's Law for Assessing the Validity of Social Science Data](#) Michael A. Long, Paul B. Stretesky, Kenneth J. Berry, Janis E. Johnston, Michael J. Lynch, 2023-11-23 Benford's Law is a probability distribution for the likelihood of the leading digit in a set of numbers This book seeks to improve and systematize the use of Benford's Law in the social sciences to assess the validity of self-reported data The authors first introduce a new measure of conformity to the Benford distribution that is created using permutation statistical methods and employs the concept of statistical agreement In a switch from a typical Benford application this book moves away from using Benford's Law to test whether the data conform to the Benford distribution to using it to draw conclusions about the validity of the data The concept of Benford validity is developed which indicates whether a dataset is valid based on comparisons with the Benford distribution and in relation to this diagnostic procedure that assesses the impact of not having Benford validity on data analysis is devised

Strata Laura Poppick, 2025-07-15 An extraordinary book Marcia Bjornerud author of *Turning to Stone* A revelatory journey through four moments in Earth's deep past and their lessons for our future The epic stories of our planet's 4.54 billion year history are written in strata ages-old remnants of ancient seafloors desert dunes and riverbeds striping landscapes around the world In this brilliantly original debut work science writer Laura Poppick decodes strata to lead us on a journey through four global transformations that made our lives on Earth possible the first accumulations of oxygen in the atmosphere the deep freezes of Snowball Earth the rise of mud on land and accompanying proliferation of plants and the dinosaurs reign on a hothouse planet Poppick introduces us to the researchers who have devoted their careers to understanding the events of deep time including the world's leading stegosaur scientist She travels to sites as various as a Minnesotan iron mine that runs half a mile deep and a corner of the Australian Outback where glacial deposits date from the coldest times on Earth Ultimately she demonstrates that the planet's oceans continents atmosphere life and ice have always conspired to bring stability to Earth even if we are only just beginning to understand how these different facets interact A work in the tradition of John McPhee *Strata* allows us to observe how the planet has responded to past periods of environmental upheaval and shows how Earth's ancient narratives could hold lessons for our present and future
