CRC Handbook of Marine Mammal Medicine Leslie Dierauf, Frances M.D. Gulland, 2001-06-27 CRC Handbook of Marine Mammal Medicine Second Edition is the only handbook specifically devoted to marine mammal medicine and health. With 66 contributors working together to craft 45 scientifically based chapters, the text has been completely revised and updated to contain all the latest developments in this field. Building upon the solid foundation of the previous edition, the contents of this book are light years ahead of the topics presented in the first edition. See what's new in the Second Edition: Marine mammals as sentinels of ocean health; Emerging and resurging diseases; Thorough revision of the Immunology chapter; Diagnostic imaging chapters to illustrate new techniques; Quick reference for venipuncture sites in many marine mammals; Unusual mortality events and mass strandings; New topics such as a chapter on carex; Wider scope of coverage including species outside of the United States and Canada. Filled with captivating illustrations and photographs, the Handbook guides you through the natural history of cetaceans, pinnipeds, manatees, sea otters, and polar bears. Prepared in a convenient, easy-to-use format, it is designed specifically for use in the field. Covering more than 40 topics, this one-of-a-kind reference is packed with data. The comprehensive compilation of information includes medicine, surgery, pathology, physiology, husbandry, feeding, and housing, with special attention to strandings and rehabilitation. The setting is the present-day Hamptons, that sun-drenched stretch of expensive ocean frontage where the rich and privileged while away their summers. Two attractive college girls, Amy Joy and Amy Beth, are looking for a good time and think they have found it in the person of Kip, a handsome prep who is in flight from the lavish home he shares with his divorced, domineering, and bitingly sophisticated mother and her narcissistic married lover. And romance does develop, if not quite in the manner anticipated, as the triangular affair of the young people is deftly counterpointed against the vapid relationship of the older couple. But while

high comedy and sharp observation prevail the play yields a lacerating portrait of a contemporary upper middle class that is sadly and humorously bored self indulgent and emotionally reckless Publisher s description **Planet Earth and the New Geoscience** Victor Schmidt,William Harbert,2003-08 *Japanese Animal and Floral Designs* Dover Publications Inc,2006-01-01 For designers and hobbyists in search of subjects with an authentic Far Eastern flavor here are more than 310 graceful black and white details from landscapes florals and creatures of land sea and air *Commerce Business Daily* ,1999-07 **Yellow River, The: Water And Life** Tetsuya Kusuda,2009-10-20 The Yellow River basin located in the semi arid and arid climate zones in northern China is confronted with serious problems of water deficit as well as water pollution Due to increasing population rising living standards increasing pressure of expanding irrigation areas and developing industries in the basin efficient water resource allocation has become a pressing issue On the surface this problem appears domestic but in reality it is of international proportions it may impact other countries through trade As such development in the basin is severely curtailed In order to understand and provide a way of thinking about the issues pertaining to the current state of water resources in the basin The Yellow River systematically explains the methods of modeling and the mechanism of water circulation on each element while introducing several new age technologies for water saving This book also presents the cutting edge research results of a five year project that improved the sustainability in utilizing and controlling water in the Yellow River basin BSCS Science Technology : Investigating Life Systems, Teacher Edition ,2005 **Water for Food Water for Life** David Molden,2013-07-23 Managing water resources is one of the most pressing challenges of our times fundamental to how we feed 2 billion more people in coming decades eliminate poverty and reverse ecosystem degradation This Comprehensive Assessment of Water Management in Agriculture involving more than 700 leading specialists evaluates current thinking on water and its interplay with agriculture to help chart the way forward It offers actions for water management and water policy to ensure more equitable and effective use This assessment describes key water food environment trends that influence our lives today and uses scenarios to explore the consequences of a range of potential investments It aims to inform investors and policymakers about water and food choices in light of such crucial influences as poverty ecosystems governance and productivity It covers rainfed agriculture irrigation groundwater marginal quality water fisheries livestock rice land and river basins Ample tables graphs and references make this an invaluable work for practitioners academics researchers and policymakers in water management agriculture conservation and development Published with IWMI Water, Life and Civilisation Steven Mithen,Emily Black,2011-04-21 A unique interdisciplinary study of the relationships between climate hydrology and human society from 20 000 years ago to the present day within the Jordan Valley It describes how state of the art models can simulate the past present and future climates of the Near East reviews and provides new evidence for environmental change from geological deposits builds hydrological models for the River Jordan and associated wadis and explains how present day urban and rural communities manage their water supply
