The Redesigning Earth John T. Tanacredi, 2019-12-12. This book provides insight into the basic aspects of ecology that impact or are affected by engineering practices. Ecological principals are described and discussed through the lens of the influences that built structures have on the Earth's biological, geological and chemical systems. The text goes on to elucidate the engineering influences that have or will influence the face of the Earth. These influences redesign the Earth either by destroying natural systems and replacing them with highly subsidized systems or by attempting to restore highly disturbed or contaminated systems with the basic natural systems that were originally present. **Annual Report of the Marine Mammal Commission** United States. Marine Mammal Commission, 1992. **The Meaning of Myth in World Cultures** Michael Buonanno, 2018-12-20. Mythology circulated in sacred stories, myths and their reenactments, rituals is the basis of any society's religion and religion is an essential key to identity. Mythology's meaning depends on the elaboration of identity in cultural metaphors that are at the same time ecological, arising from a society's environmental exploitation, sociological, based on indigenous social relations and ideological, couched in terms of a society's worldview. But tellingly these metaphors are embodied in anthropomorphic spirits fostering a deep sense of identification with those spirits as well as with individuals who share in one's spiritual devotions. This study examines mythology from a global perspective, citing case studies in cultural traditions from Africa, Europe, Oceania, Native America and elsewhere. *Encyclopedia of the World's Zoos* Catharine E.
