Seaports Of The Americas:

America's Container Ports, 2011 The Department of Transportation's Bureau of Transportation Statistics has released an overview of the movement of maritime freight handled by the nation's container ports in 2009 through mid 2010 The report summarizes trends in maritime freight movement since 1995 especially during the last five years It also covers the impact of the recent U S and global economic downturn on container traffic regional shifts in cargo handled vessel calls and port capacity the rankings of U S ports among the world's top ports and the number of maritime container entries into the United States compared to truck and rail containers The report also includes summaries of landside access to container ports and maritime security initiatives

Chinese Overseas Ports in Europe and the Americas Jean-Marc Blanchard, 2023-07-21 This book analyzes the progress gains and effects of Chinese overseas ports through in depth and systematic studies of numerous cases in Europe and Latin America China's participation in overseas ports especially under the rubric of the Belt and Road Initiative is a matter of great concern to businesspeople policymakers and researchers pondering the implications of Chinese infrastructure activities and overseas investment Yet there is insufficient knowledge concerning the actual nature of China's role in specific ports the economic and other consequences associated with that involvement and the wider economic political and environmental effects of those economic effects The chapters of this book fill these gaps by examining ports in diverse European countries like Denmark Germany Greece the Netherlands and the United Kingdom and various Latin American countries including Brazil and Jamaica The book illustrates why Chinese seaports succeed or fail why they have the military economic and other consequences that they do and why these consequences produce or fail to generate other effects such as political influence This book will appeal to audiences with interests in China's overseas seaports foreign direct investment FDI and infrastructure specifically and foreign direct investment geopolitics and the political economy of national security more generally

America's Black Sea Fleet Estate of Robert E Shenk, 2012-11-15 Drawing on previously untapped sources Robert Shenk offers a revealing portrait of America's small Black Sea fleet in the years following World War I In a high tempo series of operations throughout the Black and Aegean Seas and the eastern Mediterranean this small force of destroyers and other naval vessels responded ably to several major international crises Home ported in Constantinople U S Navy ships helped evacuate some 150 000 White Russians during the last days of the Russian Revolution coordinated the visits of the Hoover grain ships to ports in southern Russia where millions were suffering a horrendous famine reported on the terrible death marches endured by the Greeks of the Pontus region of Turkey and conducted the evacuation of hundreds of thousands of Greek and Armenian refugees from burning Smyrna the cataclysmic

conclusion of the Turkish Nationalist Revolution After Smyrna the destroyers escorted Greek steamers in their rescue of ethnic Christian civilians being expelled from all the ports of Anatolian Turkey Shenk s incisive depiction of Adm Mark Bristol as both head of U S naval forces and America s chief diplomat in the region helps to make this book the first ever comprehensive account of a vital but little known naval undertaking Global Port Cities in North America Boris Vormann,2014-11-27 As the material anchors of globalization North America s global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public
