Bruemmer Bozeman, 2015-03-08 Do modern Western ideas about the nature of conflict and its resolution apply to Africa To answer this question Adda Bozeman examines conflict in Africa south of the Sahara in its many social political and cultural aspects past and present The author shows how African perspectives on war and diplomacy have evolved under the influence of nonliteracy tribalism and a concept of undifferentiated time In addition she confirms that indigenous cultural traditions are resurgent everywhere making it unlikely that African political values will become more closely aligned with those of the West The two civilizations view conflict differently and have different ways of resolving it The Africans are more at ease with conflict than their Western counterparts and they do not see war and peace as the mutually exclusive phenomena that Occidental societies hold them to be The author concludes that modern Western concepts of conflict not only do not but cannot allow for African realities Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Psychology and Race**

Peter Watson, Since the problems of race relations are worldwide the international origins and perspectives of this excellent and timely book are especially advantageous More research has been done in the United States than elsewhere on the psychology of race relations so it is appropriate that a plurality of the chapters of this book are by American authors a stellar group that includes leading contributors to our contemporary knowledge of the topic Contributors from the English speaking Commonwealth countries are next in number followed by authors from the United Kingdom where race related issues have only recently become a salient concern of politics and social ethics The editor has assigned topics to his carefully chosen author experts not by country or region but by matching the expertise of each author against a need for coherent analysis of the important aspects of psychology and race Psychology and Race is divided into two major parts The first half of the book looks at the interracial situation itself The first section concentrates on the majority or dominant group and describes the development and measurement of racial awareness and prejudice and techniques for reducing prejudice the second section focuses on the reactions of subordinate or minority groups and the third deals with specific aspects of interpersonal interaction attitudes behavior and performance when the people concerned are of different races The book also looks at those areas of life where race is relevant and where psychology can help in an understanding of the situation The scope of

this volume the distinction of its authors and the hardheaded sense of reality it brings to the discussion of these extremely complex issues will make it an invaluable resource not only for teachers and students but also for everyone concerned in any way with this most pressing issue of our times Peter Watson was deputy editor of The New Society and spent a total of four years with The London Sunday Times as part of their Insight Team He has written several books and since 1998 has been Research Associate at the Illicit Antiquities Research Centre located at the McDonald Institute for Archaeological Research at the University of Cambridge United Kingdom
