Search For The Invisible:

The Invisible Web Chris Sherman, Gary Price, 2001 Finding content on the Internet which isn't located through more conventional means such as search engines *Efficient Information Searching on the Web* Jonas Fransson, 2010-05 Information searching on the Web has become part of our everyday life *Efficient Information Searching on the Web* deals with different aspects which are important to become a better searcher To search for information is one of the most common occupations on the Web We do it for work for studies and in our spare time We search for information about illnesses far away countries or spare parts for the car The Web is an important source of information no matter if you are a journalist a student a university researcher or a teacher Everybody can become more effective when it comes to searching for information Central matters of the book are How does a search engine work How may the search services be used more efficiently What is the invisible Web How can the information be managed once it is found **The Hidden Web** William O. Scheeren, 2012-02-02 Google is certainly a useful Internet search tool for general topics but most of the information available on the Invisible Web can't be found through Google This book explains the value of the Invisible Web and how to access it Most students and researchers possess only rudimentary Internet searching skills The majority of school and public librarians are not aware of the breadth and depth of information available on the Hidden Web This is unfortunate as the ability to navigate the Hidden Web in schools and public libraries is essential to locating the most current and authoritative information The Hidden Web A Sourcebook serves as a valuable source of information about the Hidden Web much of which comprises websites containing statistical information or data from a wide variety of government agencies The concepts search techniques and specific websites presented will be helpful in information literacy instruction and the teaching of research skills The Lawyer's Guide to Fact Finding on the Internet Carole A.
