Glenn Cohen,Holly Fernandez Lynch,Effy Vayena,Urs Gasser,2018-03-08 When data from all aspects of our lives can be relevant to our health from our habits at the grocery store and our Google searches to our FitBit data and our medical records can we really differentiate between big data and health big data Will health big data be used for good such as to improve drug safety or ill as in insurance discrimination Will it disrupt health care and the health care system as we know it Will it be possible to protect our health privacy What barriers will there be to collecting and utilizing health big data What role should law play and what ethical concerns may arise This timely groundbreaking volume explores these questions and more from a variety of perspectives examining how law promotes or discourages the use of big data in the health care sphere and also what we can learn from other sectors A Treatise of the Law of Bills of Exchange John Barnard Byles,1853 A Philosophy of Evidence Law H. L. Ho,2008-03-06 The dominant approach to evaluating the law on evidence and proof focuses on how the trial system should be structured to guard against error This book argues instead that complex and intertwining moral and epistemic considerations come into view when departing from the standpoint of a detached observer and taking the perspective of the person responsible for making findings of fact Ho contends that it is only by exploring the nature and content of deliberative responsibility that the role and purpose of much of the law can be fully understood In many cases values other than truth have to be respected not simply as side constraints but as values which are internal to the nature and purpose of the trial A party does not merely have a right that the substantive law be correctly applied to objectively true findings of fact and a right to have the case tried under rationally structured rules The party has more broadly a right to a just verdict where justice must be understood to incorporate a moral evaluation of the process which led to the outcome Ho argues that there is an important sense in which truth and justice are not opposing considerations rather principles of one kind reinforce demands of the other This book argues that the court must not only find the truth to do justice it must do justice in finding the truth **Abbott's Cyclopedic Digest of All the Decisions of All the Courts of New York from the Earliest Time to the Year 1900** De Witt Clinton Blashfield,George Foster Longsdorf,1901 **The Compiled Laws of the State of Michigan, 1948,**
