Feral Animals in the American South Abraham H. Gibson, 2016-08-30

The relationship between humans and domestic animals has changed in dramatic ways over the ages and those transitions have had profound consequences for all parties involved. As societies evolve the selective pressures that shape domestic populations also change. Some animals retain close relationships with humans but many do not. Those who establish residency in the wild free from direct human control are technically neither domestic nor wild; they are feral. If we really want to understand humanity's complex relationship with domestic animals then we cannot simply ignore the ones who went feral. This is especially true in the American South where social and cultural norms have facilitated and sustained large populations of feral animals for hundreds of years. *Feral Animals in the American South* retells southern history from this new perspective of feral animals. *The Narrow Edge* Deborah Cramer, 2015-04-28

Thousands of ravenous tiny shorebirds race along the water's edge of Delaware Bay feasting on pin-sized horseshoe crab eggs. Fueled by millions of eggs the migrating red knots fly on. When they arrive at last in their arctic breeding grounds they will have completed a near-miraculous 9,000-mile journey that began in Tierra del Fuego. Deborah Cramer followed these knots whose numbers have declined by 75 percent on their extraordinary odyssey from one end of the earth to the other from an isolated beach at the tip of South America all the way to the icy tundra. In her firsthand account she explores how diminishing a single stopover can compromise the birds' entire journey and how the loss of horseshoe crabs—ancient animals that come ashore but once a year—threatens not only the survival of red knots but also human well-being: the unparalleled ability of horseshoe crab blood to detect harmful bacteria in vaccines, medical devices and intravenous drugs safeguards human health. Cramer offers unique insight into how on an increasingly fragile and congested shore the lives of red knots, horseshoe crabs and humans are intertwined. She eloquently portrays the tenacity of small birds and the courage of many people who bird by bird and beach by beach keep red knots flying.
