Downtown Seattle: The Contemporary Skyline Marques Vickers,2019-01-09 This edition is an ongoing architectural pictorial survey of the contemporary Seattle core skyline Documenting the city s explosive growth downtown the profiling images capture the elevated monoliths of the city s urban expansion Photographed between 2016 2024 the edition traces commercial development projects from a variety of completion stages and perspective angles The heightening of the downtown Seattle skyline up mirrors the prosperity and expansion of the high technology and bio med business center The effects of the 2020 21 pandemic modestly slowed the construction pace as projects had been designed and approved years earlier The aggressive growth trend raises questions over the potential oversaturation of available office and residential space With the nature of commercial and remote employment evolving can the occupancy rates maintain the financial equilibrium necessary the keep these projects solvent and profitable The contemporary project designs are primarily compositions of steel glass and concrete creating innovate structural geometry and exterior skins Historically the Seattle regional economy was dependent on the Boeing Corporation and later Microsoft and Amazon as its most visible commercial institutions Broader tech growth has accelerated the demands for office space parking residential housing and transportation solutions Aggressive development has resulted in soaring rents traffic congestion and extreme gridlock The new normal will continue to address these challenges The city of Seattle appears to be playing infrastructure catch up Numerous additional developments under construction and in the planning stages will test the resiliency of the boom era Optimistic visions towards a vibrant downtown core continue forward With each subsequent monolith Seattle solidifies its claim as a building showcase of twenty first century architecture design credibility and stature Growth has remained an insatiable surge for the high technology industry to maintain its frenetic pace Perhaps soon Seattle and such a volatile industry will arrive at a crossroad where sustaining such expansion becomes problematic and difficult to sustain

Magic Lands John M. Findlay,1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World s Fair John Findlay shows how each created a sense of cohesion and sustained people s belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately

tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world's first theme park using Hollywood's movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation's prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World's Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America Seattle, Past to Present Roger Sale, 2019-10-31 Roger Sale's *Seattle Past to Present* has become a beloved reflection of Seattle's history and its possible futures as imagined in 1976 when the book was first published Drawing on demographic analysis residential surveys portraiture and personal observation and reflection Sale provides his take on what was most important in each of Seattle's main periods from the city's founding when settlers built a city great enough that the railroads eventually had to come down to the post Boeing Seattle of the 1970s when the city was coming to terms with itself based on lessons from its past Along the way Sale touches on the economic diversity of late nineteenth century Seattle that allowed it to grow describes the major achievements of the first boom years in parks boulevards and neighborhoods of quiet elegance and draws portraits of people like Vernon Parrington Nellie Cornish and Mark Tobey who came to Seattle and flourished The result is a powerful assessment of Seattle's vitality the result of old timers and newcomers mixing both in harmony and in antagonism With a new introduction by Seattle journalist Knute Berger this edition invites today's readers to revisit Sale's time capsule of Seattle and perhaps learn something unexpected about this ever changing city *Shaping Seattle Architecture* Jeffrey Karl Ochsner, 2016-06-01 The first edition of *Shaping Seattle Architecture* published in 1994 introduced readers to Seattle's architects by showcasing the work of those who were instrumental in creating the region's built environment Twenty years later the second edition updates and expands the original with new information and illustrations that provide an even richer exploration of Seattle architecture The book begins with a revised introduction that brings the story of Seattle architecture into the twenty first century and situates developments in Seattle building design within local and global contexts The book's fifty four essays present richly illustrated profiles that describe the architects careers provide an overview of their major works and explore their significance *Shaping Seattle Architecture* celebrates a wide range of people who helped form the region's built environment It provides updated information about many of the architects and firms profiled in the first edition Four individuals newly included in this second edition are Edwin J Ivey a leading residential designer Fred Bassetti an important contributor to Northwest regional modernism L Jane Hastings one of the region's foremost women in architecture and Richard Haag founder of the landscape architecture program at the University of Washington and designer of Gas Works

Park and the Bloedel Reserve The book also includes essays on the buildings of the Coast Salish people who inhabited Puget Sound prior to Euro American settlement the role that architects played in speculative housing developments before and after World War II and the vernacular architecture built by nonprofessionals that makes up a portion of the fabric of the city Shaping Seattle Architecture concludes with a substantial reference section updated to reflect the last twenty years of research and publications A locations appendix offers a geographic guide to surviving works The research section directs interested readers to further resources and the appendix Additional Significant Seattle Architects provides thumbnail sketches of nearly 250 important figures not included in the main text
