Emery, Elazar Uchupi, 2012-12-06 The explosion of interest effort and information about the ocean since about 1950 has produced many thousand scientific articles and many hundred books In fact the outpouring has been so large that authors have been unable to read much of what has been published so they have tended to concentrate their own work within smaller and smaller subfields of oceanography Summaries of information published in books have taken two main paths One is the grouping of separately authored chapters into symposia type books with their inevitable overlaps and gaps between chapters The other is production of lightly researched books containing drawings and tables from previous publications with due credit given but showing assembly line writing with little penetration of the unknown Only a few books have combined new and previous data and thoughts into new maps and syntheses that relate the contributions of observed biological chemical geological and physical processes to solve broad problems associated with the shape composition and history of the oceans Such a broad synthesis is the objective of this book in which we tried to bring together many of the pieces of research that were deemed to be of manageable size by their originators The composite may form a sort of plateau above which later studies can rise possibly benefited by our assembly of data in the form of new maps and figures A Guide to The Maximus Poems of Charles Olson George F. Butterick, 2022-05-27 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978 *The Great Pictorial History of World Crime* Jay Robert Nash, 2004-04-29 The vast and mysterious world of criminals from ancient times through the 21st century is vividly captured in *The Great Pictorial History of World Crime* This unique and staggering reference work chronicles every major criminal act from every era A definitive reference source to worldwide crime this unparalleled survey is organized into sixteen chapters Assassination Bigamy Burglary Cannibalism Celebrity Slayings Drugs Fraud Gangs Gangsters and Organized Crime Kidnapping Mass Murder Piracy Robbery Secret Criminal Societies Serial Killers Terrorism Unsolved Homicides Each chapter begins with an essay that introduces the topic and provides a concise overview of the historical social and political significance of the crime Subjects are further developed crime by crime through descriptive entries covering the criminal

Invisible Residents Ivan T. Sanderson, 2005 This book is a groundbreaking contribution to the study of the UFO enigma originally published over 30 years ago In this book Sanderson a renowned zoologist with a keen interest in the paranormal puts forward the curious theory that a oeOINTS Other Intelligences live under the Eartha TM s oceans This underwater parallel civilization may be twice as old as Homo sapiens he proposes and may have a oedeveloped what we call space flight Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle What better place to have an impenetrable base than deep within the oceans of the planet Yet if UFOs or at least some of them are coming from beneath our oceans or lakes does it necessarily mean that there is another civilization besides our own that is responsible In fact could it be that since WWII a number of underwater UFO bases have been constructed by the very human governments of our planet Whatever their source Sanderson offers here an exhaustive study of USOs Unidentified Submarine Objects observed in nearly every part of the world He presents many well documented and exciting case studies of these unusual sightings more

DISTANT HORIZONS Gian Quasar, 2011-10 Truth is stranger than fiction it is said If so then Distant Horizons presents some of the strangest sea mysteries of all time For it is not the product of uncritically passing along tales of the sea It is the result of decades of research The stories in this compendium are true often presented with meticulous detail Sometimes this explodes myth Sometimes the facts reveal myth to be anemic by comparison Famous ghost ships like the Mary Celeste and the Carroll A Deering have become literary formula and economic rehash But what are the actual facts Thousands of derelicts once peppered the North Atlantic but these two mystery ships have stood the test of time What is really so unique about them The Bermuda Triangle has earned its infamous reputation but is it really to blame for some of its most famous victims Did the Marine Sulphur Queen truly even vanish in the Triangle What about the USS Cyclops Could it truly be the American version of the HMS Bounty
