Finishing the Mysteries of Gods and Symbols Seven Star Hand, 2010-09-17 Here is comprehensive proof that the symbolism of many ancient texts canons and concepts is an advanced and extremely ancient spiritual and philosophical technology that predates all extant religions and mystery schools Consequently here is proof beyond disproof that all three so called Faiths of Abraham are purposeful deceptions Accordingly related esoterica mystery schools and the New Age are rife with error caused by undue reliance upon the assertions of these religions and their leaders Throughout this book I present verifiable proof that ancient sages and prophets opposed religion and wisely never trusted religious leaders As comprehensive validation of this they redundantly encoded stunning proof of why throughout pivotal symbolic narratives and related concepts The ancient sages and prophets hid vital secrets from religious leaders throughout the previous several millennia When these decoded details are compared to the history words and deeds of these religions and their leaders they finally prove the truth about many long hidden things These religions have always purposely imposed ignorance based on the deceptive recasting of earlier symbolic concepts and narratives that also expertly encoded the keys to ancient wisdom as redundant proofs of the truth Arrogant religious leaders while hypocritically lecturing others about morality have long overlooked that the ancient sages and prophets were painfully aware of their then current and future misdeeds and deceptions and patiently and expertly prepared for them

Mystical Doctrines of Deification John Arblaster, Rob Faesen, 2018-10-03 The notion of the deification of the human person theosis theopoi sis deificatio was one of the most fundamental themes of Christian theology in its first centuries especially in the Greek world It is often assumed that this theme was exclusively developed in Eastern theology after the patristic period and thus its presence in the theology of the Latin West is generally overlooked The aim of this collection is to explore some Patristic articulations of the doctrine in both the East and West but also to highlight its enduring presence in the Western tradition and its relevance for contemporary thought The collection thus brings together a number of capita selecta that focus on the development of theosis through the ages until the Early Modern Period It is unique not only in emphasising the

role of theosis in the West but also in bringing to the fore a number of little known authors and texts and analysing their theology from a variety of fresh perspectives Thus mystical theology in the West is shown to have profound connections with similar concerns in the East and with the common patristic sources By tying these traditions together this volume brings new insight to one of mysticism s key concerns As such it will be of significant interest to scholars of religious studies mysticism theology and the history of religion
