The Mystery of the Sea; a Novel Bram Stoker,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1902 edition Excerpt the inside there were two iron handles let into the stone for the purpose I cannot say I was at ease in my mind I was however determined to go on and with a prayer to God for protection and a loving thought of Marjory I went on my way The passage was doubtless of natural origin for it was evident that the seams in the rock were much like those on the coast where the strata of different geological formations joined Art had however improved the place wonderfully Where the top had come too low it had been quarried away the remnants still lay adjacent where the cave broadened out The floor where the slope was steep was cut into rough steps Altogether there were signs of much labour in the making of the passage As I went down I kept an eye on the compass whenever I came to a turn so that might have a rough idea of the direction in which I was going In the main the road with counterbalancing curves and angles led straight down When I had got to what I considered must be half way allowing for the astounding magnitude which seems to be the characterisation of even a short way under ground the passage forked and at a steep angle another passage lower and less altered than that along which had come turned away to the left Going a few feet up it I could hear the sound of running water This was evidently the passage to the reservoir CHAPTER XXXI MARJORY S ADVENTURE As I felt that time in which I had the passage all to myself was precious I turned back to the main way down The path was very steep and low and the rock underfoot was cut in rude steps as I held the lantern before me I had to droop it so that I could smell the hot metal where the flame touched the back It was indeed a steep and difficult way made
