Does Technology Drive History? Merritt Roe Smith, Leo Marx, 1994-06-02 These thirteen essays explore a crucial historical question that has been notoriously hard to pin down To what extent and by what means does a society's technology determine its political social economic and cultural forms These thirteen essays explore a crucial historical question that has been notoriously hard to pin down To what extent and by what means does a society's technology determine its political social economic and cultural forms Karl Marx launched the modern debate on determinism with his provocative remark that the hand mill gives you society with the feudal lord the steam mill society with the industrial capitalist and a classic article by Robert Heilbroner reprinted here renewed the debate within the context of the history of technology This book clarifies the debate and carries it forward Marx's position has become embedded in our culture in the form of constant reminders as to how our fast changing technologies will alter our lives Yet historians who have looked closely at where technologies really come from generally support the proposition that technologies are not autonomous but are social products susceptible to democratic controls The issue is crucial for democratic theory These essays tackle it head on offering a deep look at all the shadings of determinism and assessing determinist models in a wide variety of historical contexts Contributors Bruce Bimber Richard W Bulliet Robert L Heilbroner Thomas P Hughes Leo Marx Thomas J Misa Peter C Perdue Philip Scranton Merritt Roe Smith Michael L Smith John M Staudenmaier Rosalind Williams

Lewis Mumford and Patrick Geddes Frank G. Novak Jr., 2014-04-23 I am a disciple of Patrick Geddes and I am an abject admirer of everything he has said and done The tantalising nearness of everything we most want were it not for some fatal stubborn grain in both of us Geddes and I linked together intellectual and emotional might still conquer the world For lack of this he

will be imperfectly articulate and I perhaps will have nothing to say These two comments by Lewis Mumford written at either end of his largely epistolary relationship with Patrick Geddes frame an astonishing correspondence between two of our century's greatest thinkers on Western civilisation Mumford was the versatile New York cultural critic famous for his writings on architecture the city and technology His master Geddes was the Scots biologist sociologist and planner the professor of things in general The letters reveal much about the intellectual culture of the first half of the Twentieth Century as they chart an extraordinary Anglo American relationship between very different men this friendship initially of master and disciple even father son was based on a shared intellectual quest and inspired the work of both All that exists of those letters and much previously unpublished material besides has been meticulously collected and edited by Frank G Novak Jnr

American Philosophy Erin McKenna, Scott L. Pratt, 2015-02-26 American Philosophy offers the first historically framed introduction to the tradition of American philosophy and its contemporary engagement with the world Born out of the social and political turmoil of the Civil War American philosophy was a means of dealing with conflict and change In the turbulence of the 21st century this remains as relevant as ever Placing the work of present day American philosophers in the context of a history of resistance through a philosophical tradition marked by a commitment to pluralism fallibilism and liberation this book tells the story of a philosophy shaped by major events that call for reflection and illustrates the ways in which philosophy is relevant to lived experience This book presents a survey of the historical development of American philosophy as well as coverage of key contemporary issues in America including race theory feminism indigenous peoples and environmentalism and is the ideal introduction to the work of the major American thinkers past and present and the sheer breadth of their ideas and influence
