Merle Longwood, William C. Schipper, Philip

Culbertson, Gar Kellom, 2011-12-08 Young men undergo significant changes during their years in college. They wrestle with big questions which are essentially spiritual questions as they ponder who they are, what they believe, what kind of persons they want to become, and how they might shape the world into something they can feel comfortable being themselves in. Those who participate in men's groups realize that their involvement can nurture their inner lives as they explore these questions and connect to transcendent values and a vision of a larger whole. This book includes historical and sociological perspectives on men and spirituality and an expanded case study of how one campus pioneered in the development of men's spirituality groups which became a model for other campuses. It includes quantitative empirical research that explores college men's openness to spirituality and their interest in men's groups. The book's most extensive discussion is based on a qualitative analysis of thirty-six interviews with male college students focusing on their understanding of the relationship between their masculinity and their spirituality and how spirituality groups provided a venue in which they could begin to engage what it means to be spiritual and what it means to be a man. Contributors include W. Merle Longwood, William Schipper, O. S. B. Philip Culbertson, and Gar Kellom. **The Psychology of Men in Context** Michael Addis, Ethan Hoffman, 2019-09-02 What does it really mean to say that boys will be boys, men are from Mars, or that contemporary men are in crisis? Does modern psychology support or refute these notions? And how is psychological theory and research about boys and men used in society? *The Psychology of Men in Context* is an essential introduction to the field which challenges readers to examine psychological research on men, masculinity, and gender and consider its impact on daily life through everyday speech, popular media, political rhetoric, and more. The authors offer a range of lenses for studying masculinity, including biology, social learning, social constructionism, feminism, and intersectionality. Demonstrating how these frameworks can be used to understand research on pressing topics such as violence, health, and relationships, the book also considers masculinity in its broader philosophical and historical contexts, equipping readers with the tools needed to connect the psychology of men with other areas of social science. Exercises and prompts to help students relate the research to their own lives are included throughout. Designed for students at undergraduate and graduate level but suitable for anyone curious about understanding the field from a more critical, social scientific perspective, *The Psychology of Men in Context* is a valuable introduction to the history, current scholarship, and social implications of the psychological study of men and masculinity. *Sourcebook of Family Theory and Research* Vern L. Bengtson, 2005 Now available in paperback for classroom use. This comprehensive text provides a rich source of perspectives on theorising about the family for scholars, researchers, and students. Another of the book's strengths is the emphasis on multimethod approaches in family research. The book covers an impressive range of topics and issues: marital happiness, adjustment of children in divorce, marriages, gay marriage, sibling ties, ethnic families, families of colour, stepfamilies, aggression, culture, work, and family, religion, and social policy, to name a few. In summary, this superb volume is highly recommended and amply reflects the many contemporary perspectives on the family. Philip Siebler, Monash

University Victoria Sponsored by the National Council on Family Relations the Sourcebook of Family Theory and Research is the reference work on theory and methods for family scholars and students around the world This volume provides a diverse eclectic and paradoxically mature approach to theorizing and demonstrates how the development of theory is crucial to the future of family research The Sourcebook reflects an interactive approach that focuses on the process of theory building and designing research thereby engaging readers in doing theory rather than simply reading about it An accompanying website offers additional participation and interaction in the process of doing theory and making science Editors Vern L Bengtson Alan C Acock Katherine R Allen Peggye Dilworth Anderson and David M Klein have brought together a prominent group of diverse contributors ranging in race and ethnicity age and seniority and gender and sexual orientation The Sourcebook begins with a section that sets the context for future family research The subsequent sections explore changing family patterns changing family interactions within and across generations and families and larger social forces A concluding section discusses issues of teaching family theories and research Key Features Focuses on the process rather than the outcomes of family theory and research methods Emphasizes the value of multi methods approaches in family research by integrating theory development with the development of research methods Differs from many other publications on family research by describing the development of new ideas rather than just summarizing existing findings The interactive Web site and the special feature boxes within the chapters engage readers with theory and methodology Boxed features include Case Studies Spotlights on Theory Spotlights on Methods and a Discussion and Extension sections Represents a Who's Who of family researchers with contributions from many of the best researchers in the family realm The Sourcebook will be an excellent addition to any academic library It is an authoritative reference for scholars and researchers in Human Development and Family Studies Sociology Social Work and Psychology In addition the Sourcebook can also be used in graduate courses on family theory and methodology
