Environmental Organizations in Modern Germany William T. Markham, 2008 German environmental organizations have doggedly pursued environmental protection through difficult times hyperinflation and war National Socialist rule postwar devastation state socialism in the GDR and confrontation with the authorities during the 1970s and 1980s The author recounts the fascinating and sometimes dramatic story of these organizations from their origins at the end of the nineteenth century to the present not only describing how they reacted to powerful social movements including the homeland protection and socialist movements in the early years of the twentieth century the Nazi movement and the anti nuclear and new social movements of the 1970s and 1980s but also examining strategies for survival in periods like the current one when environmental concerns are not at the top of the national agenda Previous analyses of environmental organizations have almost invariably viewed them as parts of larger social structures that is as components of social movements as interest groups within a political system or as contributors to civil society This book by contrast starts from the premise that through the use of theories developed specifically to analyze the behavior of organizations and NGOs we can gain additional insight into why environmental organizations behave as they do

For Positivist Organization Theory Lex Donaldson, 1996-08-28 Organization theory is presently dominated by theories of strategic choice and politics Managers are seen as exercising a

wide choice and maximizing their personal self interest through complex power struggles This stimulating volume challenges these views arguing instead that managerial decisions are determined by the situation and serve the interests of the whole organization Showing that organizations follow laws which generalize across organizations of many different kinds in many different national cultures the book rejects the model of organizational configurations or types The author offers a critical assessment of leading organization theorists such as Henry Mintzberg John Child Michael Hann **Research and**

Intervention Gerardo M. Gonzalez,Vonnie V. Clement,1997-07 Brings together the views of members of the higher education community on alcohol and other drug abuse prevention and research on the college campus Major articles are provided on four issues prevention theory intervention research environmental influences and assessment with reviews of the articles by practitioners in the field of substance abuse prevention These reviews include reactions and perspectives from a metropolitan college campus the historically black colleges and universities a public university and a private university References and sample surveys *Social Movements and Organization Theory* Gerald F. Davis,Doug McAdam,W. Richard Scott,Mayer N. Zald,2005-05-09 Although the fields of organization theory and social movement theory have long been viewed as belonging to different worlds recent events have intervened reminding us that organizations are becoming more movement like more volatile and politicized while movements are more likely to borrow strategies from organizations Organization theory and social movement theory are two of the most vibrant areas within the social sciences This collection of original essays and studies both calls for a closer connection between these fields and demonstrates the value of this interchange Three introductory programmatic essays by leading scholars in the two fields are followed by eight empirical studies that directly illustrate the benefits of this type of cross pollination The studies variously examine the processes by which movements become organized and the role of movement processes within and among organizations The topics covered range from globalization and transnational social movement organizations to community recycling programs

Böhm,2005-11-08 Repositioning Organization Theory studies the political positioning of organization theory The book argues that there are two main projects in organization theory the hegemonic project of positioning and postmodern project of depositioning To critique the theoretical and political limits of these two projects B hm employs a range of critical and post structural philosophies Having conceptualized the need for a political event the book is a passionate call for repositioning and repoliticizing organization theory This book discusses the impossibilities of and strategies for such a project
