*Partially Ionized Gases* Morton Mitchner, Charles H. Kruger, Jr., 1973-01-01      **Partially Ionized Gases [by] M. Mitchner [and] Charles H. Kruger, Jr** Morton Mitchner, 1973      **Partially Ionized Gases** Morton Mitchner, Charles H. Kruger (Jr.), 1973      Non-Equilibrium Reacting Gas Flows Ekaterina Nagnibeda, Elena Kustova, 2009-07-09 In the present monograph we develop the kinetic theory of transport phenomena and relaxation processes in the flows of reacting gas mixtures and discuss its applications to strongly non equilibrium conditions The main attention is focused on the influence of non equilibrium kinetics on gas dynamics and transport properties Closed systems of fluid dynamic equations are derived from the kinetic equations in different approaches We consider the most accurate approach taking into account the state to state kinetics in a flow as well as simplified multi temperature and one temperature models based on quasi stationary distributions Within these approaches we propose the algorithms for the calculation of the transport coefficients and rate coefficients of chemical reactions and energy exchanges in non equilibrium flows the developed techniques are based on the fundamental kinetic theory principles The theory is applied to the modeling of non equilibrium flows behind strong shock waves in the boundary layer and in nozzles The comparison of the results obtained within the frame of different approaches is presented the advantages of the new state to state kinetic model are discussed and the limits of validity for simplified models are established The book can be interesting for scientists and graduate students working on physical gas dynamics aerothermodynamics heat and mass transfer non equilibrium physical chemical kinetics and kinetic theory of gases

**Surface wave driven molecular low pressure plasmas for general lighting** Oeguen, Celal Mohan, 2016-02-23 Nowadays compact fluorescent lamps are widely used in general lighting applications However they still struggle with acceptance problems due to the hazardous mercury which serves as the radiant component inside the lamp The presented work deals with the development of a mercury free electrodeless low pressure plasma based on a molecular filling and driven by microwaves which may represent a viable alternative to the conventional CFLs      Nuclear Science Abstracts ,1975
