Piet Mondrian 1872-1944:

Piet Mondrian, 1872-1944 Susanne Deicher, 1999 This volume presents Dutch painter Piet Mondrian 1872-1944 His earliest landscapes are rendered in an Impressionistic style but possess the marked vertical and horizontal tendencies that foreshadow his mature paintings Mondrian's work began to show the influences of Cubism and in 1912 the artist moved to Paris where he continued to refine his style continually exploring increasingly sophisticated compositions In his paintings Mondrian strove to achieve a universal form of expression by reducing form and color to their simplest components The artist termed his work Neo Plasticism Mondrian's most well known works consisted of white ground upon which was painted a grid of vertical and horizontal black lines and the three primary colors *Piet Mondrian 1872-1944* Piet Mondrian, 1994 **Piet Mondrian, 1872-1944** Art Gallery of Toronto, Robert P. Mondrian's Philosophy of Visual Rhythm Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian's unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian's neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian's approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian's own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin's famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge's zoopraxiscope the Futurists rendition of stroboscopic images and Duchamp's *Nude Descending a Staircase* Through a comparative study between Mondrian's painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian's simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian's theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader's encounter with the works of Mondrian Prof Kathleen Higgins

Freitag,2013-10-28 First published in 1997 For this second edition of Art Books A Basic Bibliography of Monographs on Artists the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition **Faith in Art** Joseph Masheck,2023-06-15 Metaphysical thought has been excluded from much of the discourse on modern art especially abstract painting By connecting ideas about faith with the initiators of abstract painting Joseph Masheck reveals how an underlying religiosity informed some of our most important abstract painters Covering Wassily Kandinsky Kazimir Malevich Piet Mondrian and El Lissitzky Masheck shows how revealed religion has been an underlying but fundamental determinant of the thinking and practice of abstract painting from its very originators He contextualizes their art within some of the historical moments of the early 20th century including the Russian revolution and the Stalinist period and explores the appeal of certain themes such as the Passion of Christ A radical new theorization of the influence of religion over visual art Faith in Art asks why metaphysics has been eliminated from the discussion where it might have something to say This is a new way of thinking about a hundred years of abstract painting

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple

Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak *Frederick Kiesler: Face to Face with the Avant-Garde* Peter

Bogner, Gerd Zillner, Frederick Kiesler Foundation, 2019-07-08 Network of superlatives Frederick Kiesler was a committed networker and communicated regularly with the who's who of the avant garde He was an important intermediary between the visionary ideas of the European Moderne movement and the up and coming New York art scene About 20 contributions portray his colorful life and his multifaceted oeuvre in various contexts and place Kiesler in a dialog with the most important artists and architects of his time The publication on the occasion of the 20 year anniversary of the Friedrich Kiesler Foundation deals with his relationship with the Bauhaus surrealism and the New York School as well as with personalities such as Richard Buckminster Fuller Marcel Duchamp Arshile Gorky Theo van Doesburg Piet Mondrian Hans Arp Sigfried Giedion and others An interwoven analysis of his life and work Contributions on individual and case studies Kiesler and Bauhaus Mondrian Buckminster Fuller Duchamp and many others *Dutch Art* Sheila D. Muller, 2013-07-04 An illustrated

feast for the eye and intellect Dutch Art explores developments in art art history art criticism and cultural history of the Netherlands from the artists workshops for the Utrecht Dom in 1475 to the latest movements of the 1990s it is lavishly illustrated with 147 black and white photographs and 16 pages in full color More than 100 internationally recognized scholars museum professionals artists and art critics contributed signed essays to this monumental work including historians sociologists and literary historians **Symbolist Aesthetics and Early Abstract Art** Dee Reynolds, 1995-03-30 This innovative analysis of the role of imagination as a central concept in both literary and art criticism studies works by Rimbaud

Mallarm Kandinsky and Mondrian **Late Thoughts** Karen Painter, Thomas E. Crow, 2006 Collects nine essays that discusses the creativity of influential artists as well as the legacy of their work following their deaths and covers Wolfgang Amadeus Mozart Piet Mondrian Frank Gehry and others **Yves Saint Laurent** Adam Geczy, Vicki Karaminas, 2025-08-05 The enduring influence of Saint Laurent's designs in modern fashion is undeniable Concepts introduced by Saint Laurent like the tuxedo jacket for women and the sheer blouse and dress have become staples in contemporary fashion transcending their origins to become symbols of power elegance and sexuality His ability to anticipate and articulate the needs and desires of the modern woman has left a lasting blueprint for how fashion interacts with social change and individual identity Moreover even after his death at 71 in 2008 Saint Laurent's integration of art and fashion continues to inspire current designers seen in the ongoing collaborations between high fashion and contemporary artists Saint Laurent was above all an artist of synthesis of agglomeration and reshaping of conglomeration and adaptation His work is a fusion of the tactile and aesthetic with fancy and supposition for his interiors are not what were but could have been a projection of imagination and personality It is a straddling of two separate worlds which is crucial to fashion His significance is in making this explicit

Both Worlds at Once Amir Cohen-Shalev, 2002 Both Worlds at Once is a study of works of art conceived and produced late in their creators' careers It pronounces an alternative to the mainstream life span creativity research which has in general adopted a decline perspective to the fruits of old age Amir Cohen Shalev argues that this age decrement approach misses what the artists themselves tried to do in old age which is often to develop a new form that allows them to thrive on ambivalence Against the bleak predictions of developmental psychology and folk wisdom this book focuses on old age as a unique stage of creative activity *Pixels & Paintings* David G. Stork, 2023-11-14 PIXELS PAINTINGS The discussion is firmly grounded in established art historical practices such as close visual analysis and an understanding of artists working methods and real world examples demonstrate how computer assisted techniques can complement traditional approaches Dr Emilie Gordenker Director of the Van Gogh Museum The pioneering presentation of computer based image analysis of fine art forging a dialog between art scholars and the computer vision community In recent years sophisticated computer vision graphics and artificial intelligence algorithms have proven to be increasingly powerful tools in the study of fine art These methods some adapted from forensic digital photography and others developed specifically for art empower a growing number of computer savvy art scholars conservators and historians to answer longstanding questions as well as provide new approaches to the interpretation of art Pixels Paintings provides the first and authoritative overview of the broad range of these methods which extend from image processing of palette marks brush strokes and shapes up through analysis of objects poses style composition to the computation of simple interpretations of artworks This book stresses that computer methods for art analysis must always incorporate the cultural contexts appropriate to the art studies at hand a blend of humanistic and scientific expertise Describes powerful computer image analysis methods and their application to problems in the history

and interpretation of fine art Discusses some of the art historical lessons and revelations provided by the use of these methods Clarifies the assumptions and applicability of methods and the role of cultural contexts in their use Shows how computation can be used to analyze tens of thousands of artworks to reveal trends and anomalies that could not be found by traditional non computer methods Pixels Paintings is essential reading for computer image analysts and graphics specialists conservators historians students psychologists and the general public interested in the study and appreciation of art

Meanings of Abstract Art Paul Crowther, Isabel Wünsche, 2012-10-12 Traditional art is based on conventions of resemblance between the work and that which it is a representation of Abstract art in contrast either adopts alternative modes of visual representation or reconfigures mimetic convention This book explores the relation of abstract art to nature taking nature in the broadest sense the world of recognisable objects creatures organisms processes and states of affairs Abstract art takes many different forms but there are shared key structural features centered on two basic relations to nature The first abstracts from nature to give selected aspects of it a new and extremely unfamiliar appearance The second affirms a natural creativity that issues in new autonomous forms that are not constrained by mimetic conventions Such creativity is often attributed to the power of the unconscious The book covers three categories classical modernism Mondrian Malevich Kandinsky Arp early American abstraction post war abstraction Pollock Still Newman Smithson Noguchi Arte Povera Michaux postmodern developments and the broader historical and philosophical scope
