Pointing Where Language Culture And Cognition Meet:

Pointing Sotaro Kita, 2003-06-20 Pointing has captured the interest of scholars from various fields who study communication. However, ideas and findings have been scattered across diverse publications in different disciplines and opportunities for interdisciplinary exchange have been very limited. The editor's aim is to provide an arena for such exchange by bringing together papers on pointing gestures from disciplines such as developmental psychology, psycholinguistics, sign language, linguistics, linguistic anthropology, conversational analysis, and primatology. Questions raised by the editors include: Do chimpanzees produce and comprehend pointing gestures in the same way as humans? What are cross-cultural variations of pointing gestures? In what sense are pointing gestures human universal? What is the relationship between the development of pointing and language in children? What linguistic roles do pointing gestures play in signed language? Why do speakers sometimes point to seemingly empty space in front of them during conversation? How do pointing gestures contribute to the unfolding of face-to-face interaction that involves objects in the environment? What are the semiotic processes that relate what is pointed at and what is actually meant by the pointing gesture? The relationship between the two are often not as simple as one might think. Do pointing gestures facilitate the production of accompanying speech? The volume can be used as a required text in a course on gestural communication with multidisciplinary perspectives. It can also be used as a supplemental text in an advanced undergraduate or graduate course on interpersonal communication, cross-cultural communication, language development, and psychology of language. *Demonstratives, Deictic Pointing and the Conceptualization of Space* Holger Diessel, Kenny Coventry, Harmen Gudde, Olga Capirci, 2021-05-19 Ethnomethodological Conversation Analysis in Motion Pentti Haddington, Tiina Eilittä, Antti Kamunen, Laura Kohonen-Aho, Tuire Oittinen, Iira Rautiainen, Anna Vatanen, 2023-09-29 This volume discusses current and emerging trends in Ethnomethodological Conversation Analysis (EMCA). Focusing on step-by-step procedures of talk and interaction in real time, EMCA explores how people through locally produced public and common-sensical practices accomplish activities together and thereby make sense and create social order as part of their everyday lives. The volume is divided into four parts and it provides a timely methodological contribution by exploring new questions, settings, and recording technologies in EMCA for the study of social interaction. It addresses the methodological diversity in EMCA, including current practices as well as those testing its boundaries, and paves the way for the development of future interaction research. At the same time, the book offers readers a glimpse into the ways in which human and non-human participants operate with each other and make sense of the world around them. The authors represent diverse fields of research such as language studies, sociology, social psychology, human-computer interaction, and cognitive science. Ultimately, the book is a conversation opener that invites critical and constructive dialogue on how EMCA's methodology and toolbox could be developed for the purpose of acquiring richer perspectives on endogenous social action. This is key reading for researchers and advanced students on a range of courses on conversation analysis.

Skyping the Family Richard Harper, Rod Watson, Christian Licoppe, 2019-08-13 This collection is one of the first in depth studies of video calling in family and domestic life It explores the reasons that people themselves provide to explain their video calling investigates how these reasons make that calling accountable and how in turn these reasons come to be things talked about in the calls themselves The research shows how video calling is part of the currency of contemporary family affection such calls are not just about keeping in touch they are a way of loving too and they are sometimes a way of fighting as well Skyping or Facetiming might be frequent and can seem mundane just a question of routine but what they entail is a measure of important things to families This makes this collection of interest to anyone concerned with family life and the evolving ways in which technology has a role in it Originally published as a special issue of *Pragmatics* 27 3 2017

Eye-tracking in Interaction Geert Brône, Bert Oben, 2018-11-13 This volume presents a state of the art of current research on the role of eye gaze in different types of interaction including human human and human computer interaction

Approaching the phenomenon from different disciplinary and methodological angles the chapters in the volume are united through a shared technological approach viz the use of eye tracking technology for measuring speakers and hearers eye gaze patterns while engaged in interaction Envisioned as an innovating reader the volume addresses key questions of interdisciplinary relevance e g to what extent can the analysis of fine grained eye gaze data obtained with eye tracking technology inform conversation analysis and vice versa positioning e g what is the semiotic status of eye gaze in relation to linguistic signaling and methodology e g can we strike a balance between experimental control and authenticity in setting up dialogue settings with eye tracking technology The exploration of these and other questions contributes to the demarcation of a burgeoning research program

ECSCW 2009: Proceedings of the 11th European Conference on Computer Supported Cooperative Work, 7-11 September 2009, Vienna, Austria Ina Wagner,Hilda Tellioglu,Ellen Balka,Carla Simone,Luigina Ciolfi,2009-08-19 This volume presents the proceedings of ECSCW 09 the 11th European Conference on Computer Supported Cooperative Work Each conference offers an occasion to critically review our research field which has been multidisciplinary and committed to high scientific standards both theoretical and methodological from its beginning These proceedings represent discussions and contributions to ongoing challenges One challenge comes from emerging new technologies connected to social computing gaming as well as applications supporting citizen participation in their communities As boundaries between home and work erode with the increased movement of work into home environments and new applications further blur the once separate conceptions of work and leisure our intellectual community faces challenges in the ways we think about and study work Other challenges result from transformations of the world of work itself and the role of IT in these They have been taken up in in depth studies of design practice software development and manufacturing as well as in the growing body of research on health care contexts and applications Finally there is the question of what is the European perspective in our community and whether it is worthwhile to anchor our research more firmly in such a perspective Of high relevance to our field is the strong grounding of technology development in an understanding of human activity The nineteen full papers four short papers and one discussion paper selected for this conference deal with and reflect on some of these challenges thus representing the lively debate currently ongoing in our field of research
