Reardon, Clyde Wilcox, 2006-08-16 Presenting case studies from sixteen countries on five continents The Catholic Church and the Nation State paints a rich portrait of a complex and paradoxical institution whose political role has varied historically and geographically In this integrated and synthetic collection of essays outstanding scholars from the United States and abroad examine religious diplomatic and political actions both admirable and regrettable that shape our world Kenneth R Himes sets the context of the book by brilliantly describing the political influence of the church in the post Vatican II era There are many recent instances the contributors assert where the Church has acted as both a moral authority and a self interested institution in the United States it maintained unpopular moral positions on issues such as contraception and sexuality yet at the same time it sought to cover up its own abuses it was complicit in genocide in Rwanda but played an important role in ending the horrific civil war in Angola and it has alternately embraced and suppressed nationalism by acting as the voice of resistance against communism in Poland whereas in Chile it once supported opposition to Pinochet but now aligns with rightist parties With an in depth exploration of the five primary challenges facing the Church theology and politics secularization the transition from serving as a nationalist voice of opposition questions of justice and accommodation to sometimes hostile civil authorities this book will be of interest to scholars and students in religion and politics as well as Catholic Church clergy and laity By demonstrating how national churches vary considerably in the emphasis of their teachings and in the scope and nature of their political involvement the analyses presented in this volume engender a deeper understanding of the role of the Roman Catholic Church in the world

Polish Migration to the UK in the 'New' European Union Kathy Burrell, 2016-04-22 Since the 2004 enlargement of the European Union over half a million Polish migrants have registered to work in the United Kingdom constituting one of the largest migration movements in contemporary Europe Drawing on research undertaken across a wide range of disciplines history economics sociology anthropology film studies and discourse analysis and focusing on both the Polish and British aspects of this phenomenon both emigration and immigration this edited collection investigates what is actually new about this migration flow what its causes and consequences are and how these migrants lives have changed by moving to the United Kingdom As the first book to deal with Polish migration to the United Kingdom Polish Migration to the UK in the New European Union will appeal to scholars across a range of social sciences whose work concerns migration and the migration process **Cartographies of Nature** Maano Ramutsindela, 2014-06-19 The ascendancy of border studies in the last two

decades or so and the burgeoning work on nature and society neither drew attention to ecological theories of borders nor capitalised on nature as a useful avenue through which border research could be advanced This volume fills this void by engaging with the following key questions What insights can be drawn from species borders to broaden understandings of bordering What sorts of borders are engendered by various types of conservation areas What border stories does each of these areas tell us What do conservation related borders teach us about multiple lines that divide societies Answers to these questions help researchers understand a typology of nature related borders The primary objectives of this volume are twofold The first objective is to expand and deepen the links between nature conservation and border studies by bringing species borders into conversation with border studies while at the same time paying attention to diverse conservation areas and conservation practices The second objective is to highlight forms of borders associated with various types of conservation areas and the protection of certain types of natural resources The manner in which nature conservation produces borders and the forms those borders take has the potential to enrich the conceptualisation of borders The point of departure in this volume is that conservation practices produce feedback loops on social reality Authors in the volume variously show that concerns with environmental protection and management offer possibilities for exploring and even disrupting borders within society and those between society and nature Conservation areas in particular are crucial for a meaningful analysis of nature's borders and the discourses and narratives related to them and how such discourses influence conservation practice This volume is an invaluable resource for research and upper level courses on border studies political ecology conservation and biodiversity management and environmental change and social impact *The Polish Media System 1989-2011*
