Protest: Analysing Current Trends Matthew Johnson, Samid Suliman, 2016-03-22 The politics of the twenty first century is marked by dissent tumult and calls for radical change whether through food riots anti war protests anti government tirades anti blasphemy marches anti austerity demonstrations anti authoritarian movements and anti capitalist occupations Interestingly contemporary political protests are borne of both the Right and Left and are staged in both the Global North and South Globally different instances of protest have drawn attention to the deep fissures which challenge the idea of globalisation as a force for peace Given the diversity of these protests it is necessary to examine the particular nature of grievances the sort of change which is sought and the extent to which localised protest can have global implications The contributions in this book draw on the theoretical work of Hardt and Negri David Graeber and Judith Butler among others in order to explore the nature of hegemony the Occupy movement the Arab Spring the responses of authorities to protest and emotion and public performance in and representation of protest The book concludes with David Graeber's reply to reviews of his recent *The Democracy Project: A History, A Crisis, A Movement* This book was published as a special issue of *Global Discourse*

Ideology Over Economics John Loxley, 2020-08-25T00:00:00Z Public private partnerships in which the private sector takes on roles previously carried out by the public sector have been heavily promoted in the provision of infrastructure throughout the world but especially in the UK the USA and Canada In *Ideology Over Economics* economist John Loxley examines the expansion of P3s following the 2008 global financial crisis when corporations responded to the crisis by lobbying governments for financial assistance and austerity governments responded by expanding financial resources for P3s For many governments the rationale for using P3s lies in the state manufactured fiscal crisis The usual economic arguments underlie government largesse lower cost reduced risk and high quality construction for public projects

In these arguments little has changed From his close examination of case studies of P3s in the UK Canada and developing countries John Loxley concludes that P3s do not achieve any of these promised goals and argues that the expansion of P3s owes more to ideology than to a rational evaluation of their economic and community building benefits
