**The Making of a Tropical Disease** Randall M. Packard, 2021-07-13 A global history of malaria that traces the natural and social forces that have shaped its spread and made it deadly while limiting efforts to eliminate it Malaria sickens hundreds of millions of people and kills nearly a half a million each year Despite massive efforts to eradicate the disease it remains a major public health problem in poorer tropical regions But malaria has not always been concentrated in tropical areas How did malaria disappear from other regions and why does it persist in the tropics From Russia to Bengal to Palm Beach Randall M Packard s far ranging narrative shows how the history of malaria has been driven by the interplay of social biological economic and environmental forces The shifting alignment of these forces has largely determined the social and geographical distribution of the disease including its initial global expansion its subsequent retreat to the tropics and its current persistence Packard argues that efforts to control and eliminate malaria have often ignored this reality relying on the use of biotechnologies to fight the disease Failure to address the forces driving malaria transmission have undermined past control efforts Describing major changes in both the epidemiology of malaria and efforts to control the disease the revised edition of this acclaimed history which was chosen as the 2008 End Malaria Awards Book of the Year in its original printing examines recent efforts to eradicate malaria following massive increases in funding and political commitment discusses the development of new malaria

fighting biotechnologies including long lasting insecticide treated nets rapid diagnostic tests combination artemisinin therapies and genetically modified mosquitoes explores the efficacy of newly developed vaccines and explains why eliminating malaria will also require addressing the social forces that drive the disease and building health infrastructures that can identify and treat the last cases of malaria Authoritative fascinating and eye opening this short history of malaria concludes with policy recommendations for improving control strategies and saving lives *The Waning of the Mediterranean, 1550-1870* Faruk Tabak, 2008-02-06 Conventional scholarship on the Mediterranean portrays the Inner Sea as a timeless entity with unchanging ecological and agrarian features But Faruk Tabak argues some of the traditional and olden characteristics that we attribute to it today are actually products of relatively recent developments Locating the shifting fortunes of Mediterranean city states and empires in patterns of long term economic and ecological change this study shows how the quintessential properties of the basin the trinity of cereals tree crops and small livestock were reestablished as the Mediterranean's importance in global commerce agriculture and politics waned Tabak narrates this history not from the vantage point of colossal empires but from that of the mercantile republics that played a pivotal role as empire building city states His unique juxtaposition of analyses of world economic developments that flowed from the decline of these city states and the ecological change associated with the Little Ice Age depicts large scale long term social change Integrating the story of the western and eastern Mediterranean from Genoa and the Habsburg empire to Venice and the Ottoman and Byzantine empires Tabak unveils the complex process of devolution and regeneration that brought about the eclipse of the Mediterranean

**The Andean Wonder Drug** Matthew James Crawford, 2016-09-07 In the eighteenth century malaria was a prevalent and deadly disease and the only effective treatment was found in the Andean forests of Spanish America a medicinal bark harvested from cinchona trees that would later give rise to the antimalarial drug quinine In 1751 the Spanish Crown asserted control over the production and distribution of this medicament by establishing a royal reserve of fever trees in Quito Through this pilot project the Crown pursued a new vision of imperialism informed by science and invigorated through commerce But ultimately this project failed much like the broader imperial reforms that it represented Drawing on extensive archival research Matthew Crawford explains why showing how indigenous healers laborers merchants colonial officials and creole elites contested European science and thwarted imperial reform by asserting their authority to speak for the natural world *The Andean Wonder Drug* uses the story of cinchona bark to demonstrate how the imperial politics of knowledge in the Spanish Atlantic ultimately undermined efforts to transform European science into a tool of empire
