The Qur'an in Christian-Muslim Dialogue Corrie Block, 2013-10-08 Offering an analysis of Christian Muslim dialogue across four centuries this book highlights those voices of ecumenical tone which have more often used the Qur'an for drawing the two faiths together rather than pushing them apart and amplifies the voice of the Qur'an itself Finding that there is tremendous ecumenical ground between Christianity and Islam in the voices of their own scholars this book ranges from a period of declining ecumenism during the first three centuries of Islam to a period of resurging ecumenism during the most recent century until now Among the ecumenical voices in the Christian Muslim dialogue this book points out that the Qur'an itself is possibly the strongest of those voices These findings are cause for and evidence of hope for the Christian Muslim relationship that although agreement may never be reached dialogue has led at times to very real mutual understanding and appreciation of the religious other Providing a tool for those pursuing understanding and mutual appreciation between the Islamic and Christian faiths this book will be of interest to scholars and students of Islam the Qur'an and the history of Christian Muslim relations

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient

cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa *The Postcolonial Science and Technology Studies Reader* Sandra Harding,2011-09-12 A collection of foundational and contemporary essays in postcolonial science studies **What Is Jesus?** Daniel Lee,2014-02-03 It has always been said There are two things to never discuss if you want to avoid an argument Religion and Politics Guaranteed to provoke emotion WHAT IS JESUS is a straight forward and blunt summary of the Philosophical differences of the major Religious beliefs of our world **Sacred Books of the World** Ambrose J.
