Stocking, 1982-04-15 We have at long last a real historian with real historical skills and no intra professional ax to grind All these pieces show the virtues one finds missing in nearly all of anthropological history work but Stocking s extensive and critical use of archival sources tracing of real rather than merely plausible intellectual connections and contextualization of ideas and movements in terms of broader social and cultural currents Stocking writes very clearly attacks important topics race and evolution the influence of scientism the interaction between anthropology and other disciplines and is methodologically very sophisticated Though his main theme is the development of racialism and of opposition to it his book bears on a range of issues very much alive in anthropology I would think no apprentice anthropologist ought to be pronounced a journeyman until he or she has absorbed what Stocking has to say Clifford Geertz The Institute for Advanced Study Princeton      **Race, Culture, Psychology, and Law** Kimberly Barrett, William George, 2005 In a diverse democracy law must be open to all All too often however our system of justice has failed to live up to our shared ideals because it excludes individuals and communities even as they seek to use it or find themselves caught up in it The research presented here offers hope The abstract doctrines of the law are presented through real cases Judges lawyers scholars and concerned citizens will find much in these pages documenting the need for reform along with the means for achieving our aspirations The issues presented by race ethnicity and cultural differences are obviously central to the resolution of disputes in a nation made up of people who have in common only their faith in the great experiment of the United States Constitution Here the challenges are met in an original accessible and thoughtful manner Frank H Wu Howard University and author of Yellow Race in America Beyond Black and White Kim Barrett and William George have taken on an enormous task which is matched only by its timeliness Cultural competence and cultural diversity pass off our lips as eternally valued ideals but Barrett and George have brought a critical and edifying eye to thee ideas Racism is similarly easy to acknowledge but difficult to account for in the everyday lives of ordinary people of color What we discover in this impressive volume is not only that race and culture matter but how they matter in the minds of people who are clients and the minds of people who attempt to serve them and in the courts of law that attempt to mete out justice Race Culture Psychology and the Law is essential reading for anyone with a professional or personal interest in social justice and psychological well being James M Jones Ph D Director Minority Fellowship Program

*What is Africanness? Contesting nativism in race, culture and sexualities* Charles Ngwena, 2018-01-01 What is Africanness Contesting nativism in race culture and sexualities by Charles Ngwena 2018 ISBN 978 1 920538 82 8 Pages 306 Print version Available Electronic version Free PDF available About the publication What is Africanness Contesting nativism in culture race and sexualities by Charles Ngwena Professor of Law at the Centre for Human Rights Faculty of Law University of Pretoria is a peer reviewed monograph aiming to contribute to the ongoing scholarly conversation in and beyond South Africa about who is African and what is African It aims to implicate a reductive sameness in the naming of Africans nativism by showing its teleology and effects and offers an alternative understanding of how Africans can be named or can name themselves The book develops an epistemology for constructing the hermeneutics of Africanness today long after the primal colonial moment and its debasing racialising

ideology It interrogates the making of Africa in colonial discourses and the making of an African race and African culture s and sexuality ies in ways that are not just historically conscious but also have a heuristic capacity to contest nativism from the outside as well as from within The arguments in this book go beyond problematising African identity by addressing an existential gap in theory for explicating African social identity The book develops an interpretive method a hermeneutics for locating and deciphering African identifications in ways that are historically conscious and conjunctural The hermeneutics look to the present and the future in addition to the past so that African identifications are not nailed to a mast but remain invested with mobility and the capacity to mutate radically and make new and unexpected beginnings

Comments Charles Ngwena s timely and original book is a wonderful read rich in theory and insight and an essential companion for those interested in exploring the multiplicity of histories cultures and subjectivities that constitute the diversity of Africanness and African identities Professor Cathi Albertyn School of Law University of the Witwatersrand Editor South African Journal on Human Rights This is a brilliant exploration of liberating and affirming ways to speak of African identities and sexualities reminding us there can be creative beauty where pain and dispossession have resided Rudo Chigudu Centre for Human Rights University of Pretoria This is a masterpiece Not only does the author capture the discourse and debates on Africanness he aptly examines them before offering his views on decentring the race of Africanness with the important recognition of Africa as land of diverse identifications Prof Serges Djoyou Kamga Thabo Mbeki African Leadership Institute UNISA

Mohamed, 2015-11-11 Many in higher education fear that the humanities are facing a crisis But even if the rhetoric about crisis is overblown humanities departments do face increasing pressure from administrators politicians parents and students In *A New Deal for the Humanities* Gordon Hutner and Feisal G. Mohamed bring together twelve prominent scholars who address the history the present state and the future direction of the humanities These scholars keep the focus on public higher education for it is in our state schools that the liberal arts are taught to the greatest numbers and where their neglect would be most damaging for the nation The contributors offer spirited and thought provoking debates on a diverse range of topics For instance they deplore the push by administrations to narrow learning into quantifiable outcomes as well as the demands of state governments for more practical usable training Indeed for those who suggest that a college education should be practical that it should lean toward the sciences and engineering where the high paying jobs are this book points out that while a few nations produce as many technicians as the United States does America is still renowned worldwide for its innovation and creativity skills taught most effectively in the humanities Most importantly the essays in this collection examine ways to make the humanities even more effective such as offering a broader array of options than the traditional major/minor scheme options that combine a student's professional and intellectual interests like the new medical humanities programs A democracy can only be as energetic as the minds of its citizens and the questions fundamental to the humanities are also fundamental to a thoughtful life *A New Deal for the Humanities* takes an intrepid step in making the humanities and our citizens even stronger in the future
