Persons, 2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world s population Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands These developments give real meaning to the notion of a global village Peoples of the world are growing closer in new and increasingly important ways Nonetheless there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature Fear resentment intolerance and mistreatment of the other abound in world news accounts Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions Why are such conflicts occurring now How do analysts explain these developments The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world Contributors analyze manifestations of race based movements for political empowerment in Europe and Latin America as well as racial intolerance in these same settings Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity nationalism identity and ideology The book greatly informs discussions of race and ethnicity in the

international context and provides an interesting perspective against which to view America's changing problem of race. *Race and Ethnicity in Comparative Perspective* is a timely thought provoking volume that will be of immense value to ethnic studies specialists, African American studies scholars, political scientists, historians and sociologists. ***Race Ethnicity and Difference: Imagining the Inclusive Society*** Peter Ratcliffe, 2004-06-16 This excellent book provides an extremely readable account which deserves to be widely read by a more general audience. In short, the author, in making sense of current imaginings, presents a mix of theoretical and empirical debates as he challenges exclusionary forces. The book's principal aim is to take a critical look at the nature and sources of inequalities in contemporary societies and examine the prospects for an inclusive society. This aim captures an important strength of the text as the analysis attempts to move beyond simple description and provide explanations and possible solutions to enable policy and practice to tackle disadvantage and discrimination. *Social Policy* This book addresses many of the key problems facing contemporary societies. The social significance attached to various forms of difference, most notably race and ethnicity, has been seen as resulting in the exclusion of some groups from their full rights as citizens. This in turn is viewed as presenting a series of barriers to the creation of more inclusive societies. Peter Ratcliffe explores these arguments in a variety of substantive contexts, for example immigration and the treatment of refugees and asylum seekers, housing and segregation, education, labour markets and policing and urban conflict. Particular emphasis is placed on the role of social agency on the part of minorities in confronting exclusionary forces. This lively and highly readable account deals with difficult theoretical, ethical and policy issues without resort to unnecessary jargon. It is essential reading for undergraduate students in sociology, social policy, urban geography, law and political science and is also of value to the general reader and researcher. ***Debating Diversity*** Jan Blommaert, Jef Verschueren, 2002-03-11 Immigration, racism and nationalism have become hotly debated issues in the Western world. This highly original and controversial work focuses on the language used by the vast majority who regard themselves as being open to a multi-cultural society. Using Belgium as a case study and drawing parallels with the UK, US, Europe and the former Yugoslavia, the authors analyse this language and reveal a remarkable consistency between these liberal voices such as in news reporting and the language used by radical racist and nationalist groups. ***The Cambridge Handbook of Social Sciences in Australia*** Ian McAllister, Steve Dowrick, Riaz Hassan, 2003-08-07 First published in 2003, *The Cambridge Handbook of Social Sciences in Australia* is a high quality reference on significant research in Australian social sciences. The book is divided into three main sections covering the central areas of the social sciences: economics, political science and sociology. Each section examines the significant research in the field, placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined, taught and researched. ***Gypsy Identities 1500-2000*** David Mayall, 2004-03-01 Gypsies have lived in England since the early sixteenth century, yet considerable confusion and disagreement remain over the precise identity of the group. The question 'Who are the

Gypsies is still asked and the debates about the positioning and permanence of the boundary between Gypsy and non Gypsy are contested as fiercely today as at any time before This study locates these debates in their historical perspective tracing the origins and reproduction of the various ways of defining and representing the Gypsy from the early sixteenth century to the present day Starting with a consideration of the early modern description of Gypsies as Egyptians land pirates and vagabonds the volume goes on to examine the racial classification of the nineteenth century and the emergence of the ethnic Gypsy in the twentieth century The book closes with an exploration of the long lasting image of the group as vagrant and parasitic nuisances which spans the whole period from 1500 to 2000 **Rational Choice Theory** Margaret S.

Archer,Jonathan Q. Tritter,2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory s definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education **Prison(Er) Education** David Wilson,Anne Reuss,2000-12-01 Prison er Education comprises key essays by leading prison education practitioners academics and prisoners including new work on how to evaluate the success of education within prison by Dr Ray Pawson of Leeds University and Stephen Duguid of Simon Fraser University Canada A major challenge to penal policy makers to accept the value of education beyond basic skills and at a time when prison regimes have come to be dominated by cognitive thinking skills courses **Racism and Education** David Gillborn,2008-03-11 This book challenges the dominant

assumptions and attitudes that shape education and is the first major study in the UK to adopt Critical Race Theory a radical new perspective on the nature of racism and public policy **Resource Politics in Sub-Saharan Africa** Matthias Basedau,2005 **Eelam Online** Maya Ranganathan,2011-01-18 This book details the potential of computer mediated technologies particularly the internet in creating and nurturing political and cultural identities among the widely dispersed conflict generated Sri Lankan Tamil diaspora and traces the engagement of the diaspora in Australia with the online media in the struggle for a homeland Taking the ethnic issue in Sri Lanka as a given the book explores the way in which new media has added dimensions to the issue Although the theoretical framework of the book overflows into the areas of political

communication journalism media theories and studies nationalism and social psychology it draws heavily from the theories of Ellul s social propaganda and Anderson s concept of nation as an imagined community Divided into three parts the first part explores the potential of the internet to lead to the imagination of the nation by the Sri Lankan Tamil diaspora the second part traces the online engagement of the diaspora in the making of the homeland and the third part contrasts it with the experiences and expectations of the homeland of the second generation of migrants in Australia and the Sri Lankan refugees in India With the focus shifting to the diaspora after the announcement of the decimation of the Liberation Tigers of Tamil Eelam in Sri Lanka in May 2009 the book aims to contribute to an understanding of the dynamics to underscore the increasingly significant role that communication technologies play in deciding the weave and warp of the fabric of a nation

Transforming Cities Nick Jewson, Susanne Macgregor, 2018-05-11 Transforming Cities examines the profound changes that have characterised cities of the advanced capitalist societies in the final decades of the twentieth century It analyses ways in which relationships of contest conflict and co operation are realised in and through the social and spatial forms of contemporary urban life This book focuses on the impact of economic restructuring and changing forms of urban deprivation and social exclusion It contends that these processes are creating new patterns of social division and new forms of regulation and control

Poland in a Colonial World Order Piotr Puchalski, 2021-11-18 Poland in a Colonial World Order is a study of the interwar Polish state and empire building project in a changing world of empires nation states dominions protectorates mandates and colonies Drawing from a wide range of sources spanning two continents and five countries Piotr Puchalski examines how Polish elites looked to expansion in South America and Africa as a solution to both real problems such as industrial backwardness and perceived issues such as the supposed overrepresentation of Jews in liberal professions He charts how in partnership with other European powers and international institutions such as the League of Nations Polish leaders made attempts to channel emigration to South America to establish direct trade with Africa to expedite national minorities to far away places and to tap into colonial resources around the globe Puchalski demonstrates the intersection between such national policies and larger processes taking place at the time including the internationalist turn of colonialism and the global fascination with technocratic solutions Carefully researched the volume is key reading for scholars and advanced students of twentieth century European history

Race, Trauma, and Home in the Novels of Toni Morrison Evelyn Jaffe Schreiber, 2010-12 In this first interdisciplinary study of all nine of Nobel Laureate Toni Morrison s novels Evelyn Jaffe Schreiber investigates how the communal and personal trauma of slavery embedded in the bodies and minds of its victims lives on through successive generations of African Americans Approaching trauma from several cutting edge theoretical perspectives psychoanalytic neurobiological and cultural and social theories Schreiber analyzes the lasting effects of slavery as depicted in Morrison s work and considers the almost insurmountable task of recovering from trauma to gain subjectivity With an innovative application of neuroscience to literary criticism Schreiber explains how trauma whether initiated by physical abuse dehumanization discrimination exclusion or abandonment becomes embedded in both psychic and bodily circuits Slavery and its legacy of cultural rejection create trauma on individual familial and community levels and parents unwittingly transmit their trauma to their children through repetition of their bodily stored experiences Concepts of home whether a physical place community or relationship are reconstructed through memory to provide a positive self and serve as a healing space for Morrison s characters Remembering and retelling trauma within a supportive community enables trauma victims to move forward and attain a meaningful subjectivity and selfhood Through careful analysis of each novel Schreiber traces the success or failure of Morrison s characters to build or rebuild a cohesive self starting with slavery and the initial postslavery generation and continuing through the twentieth century with a special focus on the effects of inherited trauma on children When characters attempt to escape trauma through physical relocation or to project their pain onto others through aggressive behavior or scapegoating the development of selfhood falters Only when trauma is confronted through verbalization and challenged with reparative images of home can memories of a positive self overcome the pain of past

experiences and cultural rejection While the cultural trauma of slavery can never truly disappear Schreiber argues that memories that reconstruct a positive self whether created by people relationships a physical place or a concept help Morrison s characters to establish subjectivity A groundbreaking interdisciplinary work Schreiber s book unites psychoanalytic neurobiological and social theories into a full and richly textured analysis of trauma and the possibility of healing in Morrison s novels
