Collins, 1999 The space race grew out of the Cold War between the United States and the Soviet Union the most powerful nations after World War II For a half century they competed for primacy in a global struggle Space was a crucial arena for this rivalry Before a watchful world each side sought to demonstrate its superiority through impressive feats in rocketry and space flight Meanwhile secret satellites were developed to keep a war eye on the adversary At the Cold War s end the United States and Russia agreed to build a space station and pursue other joint ventures in space A contest that had begun in fear and enmity ended in partnership Drawing on recently declassified material and featuring a wide variety of U S and Soviet artifacts Space race examines the spectacular publicly celebrated milestones of our first steps into space as well as highly secret efforts to spy on adversaries from high above the Earth In compelling photographs and terse informed text this book tells the story of time when the superpowers sought to make the heavens inseparable from the earth *Reaching for the Moon* Roger D. Launius, 2019-06-25 Fifty years after the Moon landing a new history of the space race explores the lives of both Soviet and American engineers At the dawn of the space age technological breakthroughs in Earth orbit flight were both breathtaking feats of ingenuity and disturbances to a delicate global balance of power In this short book aerospace historian Roger D Launius concisely and engagingly explores the driving force of this era the race to the Moon Beginning with the launch of Sputnik 1 in October 1957 and closing with the end of the Apollo program in 1972 Launius examines how early space exploration blurred the lines between military and civilian activities and how key actions led to space firsts as well as crushing failures Launius places American and Soviet programs on equal footing following American aerospace engineers Wernher von Braun and Robert Gilruth their Soviet counterparts Sergei Korolev and Valentin Glushko and astronaut Buzz Aldrin and cosmonaut Alexei Leonov to highlight key actions that led to various successes failures and ultimately the American Moon landing The Story of Space Steve Parker, 2015-02-26 From early pioneers of space travel to potential missions of the future the story of humans in space makes for fascinating reading The Space Race was an exciting time and the 1950s to 1970s saw some of the biggest leaps in space technology and exploration The race to put the first man on the Moon was eventually won by the USA when NASA astronauts Neil Armstrong and Buzz Aldrin became the first men on the Moon This book explores the efforts made by both NASA and the Soviet Union to reach the Moon during this period and details some of the extraordinary missions and adventures that occurred including the Apollo 11 and Apollo 13 missions
