fiction both science fiction and fantasy reflects among other things the fears of the culture that created it contributing perhaps unconsciously to our efforts to prevent our fears from coming true While the names and media change over time the themes of speculative fiction have a long history Nineteenth century works such as Frankenstein and The Invisible Man contain many of the same messages as the more modern tales of Terminator Jurassic Park and even Buffy the Vampire Slayer although almost a century separates their creation This critical study discusses the ways in which speculative fiction reflects societal fears and analyzes how such cautionary tales contribute to society's efforts to avoid the realization of these fears Beginning with a discussion of the nature of speculative fiction it takes a look at the characteristics of the cautionary tale The core of the book however is the concept of the Nightmares Model which examines and categorizes the repetition of specific themes within the genre The dangers of science and technology the perils of power and the threat of the unknown are discussed as recurrent themes within a variety of works in prose film and television Works analyzed range from Twenty Thousand Leagues Under the Sea to 2001 A Space Odyssey to The Blair Witch Project Sources include the author's own observations as a member of the genre's fandom a variety of published commentaries and the perspectives of contemporary professionals gained through personal interviews and panel discussions

**The End of Captivity?** Tripp York, 2015-07-30 In *The End of Captivity* Tripp York addresses how we talk about the good of other animals in light of a stark impossibility their freedom from us While all of us in the animal and plant kingdom are interdependent upon one another humans are unique in that we are the only animals who keep other animals captive We keep animals in zoos sanctuaries circuses conservatories aquariums research facilities slaughterhouses and on our farms and in our homes York asks what such forms of captivity say about us and how animal captivity shapes what we imagine to be the purpose of other animals What does the fact that elephants tigers and horses perform in circuses say about how we see the world What does the reality of zoological parks say about the people who create support decry protest and patronize them How important is wildlife conservation for the good of the earth What does who we put on our plate say about how we understand the theological role of other animals These are just a few questions York tackles as he weaves through the convoluted politics surrounding the captive animals in our midst

Plastic Matter Heather Davis, 2022-02-04 Plastic is ubiquitous It is in the Arctic in the depths of the Mariana Trench and in the high mountaintops of the Pyrenees It is in the air we breathe and the water we drink Nanoplastics penetrate our cell walls Plastic is not just any material it is emblematic of life in the twentieth and twenty first centuries In *Plastic Matter* Heather Davis traces plastic's relations to geology media biology and race to show how matter itself has come to be understood as pliable disposable and consumable The invention and widespread use of plastic Davis contends reveals the dominance of the Western orientation to matter and its assumption that matter exists to be endlessly manipulated and controlled by humans Plastic's materiality and pliability reinforces these expectations of what matter should be and do Davis charts these relations to matter by mapping the queer multispecies relationships between humans and plastic eating bacteria and analyzing photography that documents the racialized environmental violence of plastic production In so doing Davis provokes readers to reexamine their relationships to matter and life in light of plastic's saturation
